

# Waterfall Stabling Yard and Platform Extension Project

## Rail Service Improvement Program

December 2024 – January 2025

Transport for NSW acknowledges the Dharawal people of the Dharawal Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The Rail Service Improvement Program, formerly known as More Trains, More Services, enables a safer, more equitable, and integrated transport network where people can move safely, reliably, and efficiently across NSW.

### What work are we doing?

In December 2024 and January 2025, we will be completing the following work:

- removal and relocation of cables and cabling infrastructure
- relocation of signal infrastructure
- track rectification work.

### When and where we'll be working

Work will take place inside the rail corridor at Waterfall.

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays**.

### Out of hours work

In December, some work will be required outside of standard construction hours between **6pm Friday 6 December and 7am Monday 9 December 2024**.

In January 2025, minor rectification work will occur within standard construction hours only.

### Why we work outside of standard construction hours

We schedule work outside of standard construction hours during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

### What will this mean for you?

You may notice:

- workers and vehicles
- deliveries of equipment and materials
- noise at times from machinery and equipment.

### Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
