

Waterfall Stabling Yard and Platform Extension Project

May 2024

Transport for NSW acknowledges the Dharawal people of the Dharawal Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The More Trains, More Services program is designed to simplify and modernise the rail network, delivering a range of benefits for rail customers through better infrastructure, new trains and extra services.

What work are we doing?

In May 2024, we will be completing the following work:

- installation of cabling, light poles and CCTV equipment on recently installed footbridge and stairway
- construction of new, replacement track
- installation and testing of new signalling systems
- construction of corridor access roads and footpaths, requiring use of a vibratory roller.

When and where we'll be working

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am until 1pm on Saturday.**

Work will be undertaken in and adjacent to the rail corridor at Waterfall.

Night work

In May, some signalling work will be completed outside of standard construction hours inside the rail corridor. This work involves hand tools and light vehicles, and is not expected to impact the public.

This work has been scheduled outside of standard construction hours during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- traffic controllers and signage
- noise from machinery and equipment
- deliveries of equipment and materials.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
