Subject

Addendum assessment and decision No. 8 for proposed modifications to M1 Western Distributor Smart Motorway Project

Proposed modification

Modification to the M1 Western Distributor Smart Motorway Review of Environment Factors (REF).

Background

In 2021, Transport for NSW proposed to introduce intelligent technology, known as a smart motorway system, to the M1 corridor between Milsons Point and Allen Street in Pyrmont. This proposal is located in the North Sydney and City of Sydney local government areas (LGAs).

A review of environmental factors (REF) was prepared for the Western Distributor Smart Motorway proposal (referred to as the approved project REF) which was determined in May 2021.

A further seven (7) addendum REFs and two (2) consistency reports have been prepared and determined as listed in *Appendix A - Determined minor works REFs, determined addenda, and consistency reports*.

Purpose

The purpose of this memo is to:

- Describe the proposed modification.
- Document and assess the likely impacts of the proposed modification on the environment.
- Detail protective measures to be implemented.
- Document the recommendation of the Transport Senior Manager Environment and Sustainability and the decision by the Transport delegated manager as to whether to, or not to determine the modification to the project.

This memo is an addendum to, and is to be read in conjunction with, the previous project REF, addendum REFs and consistency reviews determined for the project.

Description of proposed modification

Transport for NSW proposes to modify the M1 Western Distributor Smart Motorway project to include the use of a portion of the land on 5-19 Bank Street, Pyrmont for a construction compound (Bank St compound), the proposed modification. The land is located under the Western Distributor on the eastern approaches to Anzac Bridge. The land is close to the main project construction site and is illustrated in **Figure 1**, **Figure 2**, and **Figure 3**.

Figure 1 –Location of site

Figure 2 – Proposed site layout 1 (April 2024)

Figure 3 – Proposed site layout 2 (other times)

Need for the proposed modification

Transport is preparing to install new, and replace existing, signage gantries on the Western Distributor at 20 locations between Anzac Bridge and Sydney Harbour Bridge. Gantry structures consist of large steel elements that are currently being stored at the Colebee Compound (described in REF Addendum No.3) before being transported over 40km on semi-trailers to Pyrmont and assembled on site.

Works on the M1 Western Distributor must be done at night outside peak traffic periods and as such the time window is limited.

The proposed Bank Street compound would support construction of the approved project and improve the overall project delivery timeframe due to the proximity of the site to the construction works. It would facilitate construction works and avoid potential delays to the delivery of the project and reduce the likelihood of works extending into morning peak traffic periods.

It is proposed that the Bank Street compound would be used for marshalling trucks arriving from the remote Colebee storage yard, gantry pre-assembly, plant and traffic control equipment storage, pre-start meetings, and worker car parking. Use of the Bank Street compound would be unrestricted, permitting 24 hour / 7 day access and use as proposed.

Chapter 2 of the approved project REF addresses the strategic need for the project, the project objectives and the options that were considered. The proposed modifications described and assessed in this addendum REF are consistent with the strategic need for the project.

The proposed modifications support provision of a Smart Motorway solution on the missing section of motorway corridor between Rozelle and North Sydney.

The proposed modifications, remain consistent with the policies and planning documents outlined in Chapter 2 of the determined project REF and its addenda as listed below:

- Future Transport Strategy
- Movement and Place Framework
- Future Transport Technology Roadmap
- Greater Sydney Regional Plan
- Eastern City District Plan
- Road Safety Plan 2021
- Connected and Automated Vehicles Plan
- State Infrastructure Strategy 2018-2038
- Sydney City Centre Access Strategy
- Sydney's Bus Future
- NSW Freight and Ports Strategy
- NSW Freight and Ports Plan

Options considered

During construction of the project Transport has sought to identify suitable lands for the project needs described above. With government owned land particularly scarce, and competing needs from other projects including Sydney Metro West, Western Distributor Network Improvements project, Western Harbour Tunnel project all within a few kilometres' radius, the project team has identified the Bank St compound site as the only suitable land available, and only for a limited time. Following this process, two options were identified for further investigation:

- Option 1 'Do not modify project'- The project would proceed without the modifications proposed in this memo.
- Option 2 'Modify project' – Construct the project with the modifications proposed in this memo.

These options were assessed against the proposal objectives and development criteria outlined in Chapter 2 of the determined REF. 'Option 1' was discounted as the potential impacts of the proposed modification are less than those of the approved project.

The proposed modification which comprises 'Option 2' would have short term traffic, noise, and lighting impacts on the local community from night-time operations but have no enduring impacts while Option 1 would result in impacts to other local communities and local roads which would need to be closed for or partially closed for assembly and workers likely to park cars on residential streets as law permits.

As such, 'Option 2' is the preferred option.

Consultation

The modification does not require formal widespread community consultation due to its limited nature. Upon determination the project team would notify, and engage with residents and businesses potentially affected by the Bank Street compound adjacent to or having an interest in the specific work areas at which this modification impacts:

- Public Open Space Manager of City of Sydney Council
- Responsible Property Manager for Transport for New South Wales (lessor/ manager)

- Senior Environment and Sustainability Officer of Transport for New South Wales

The proposed Bank Street compound is located at 5-19 Bank Street on land which Transport owns. Transport licences a section to Dragonboats NSW (DBNSW) and has consulted DBNSW's delegated representatives to discuss the potential impacts and agree suitable arrangements for co-existence at the land.

No unacceptable impacts or concerns were raised regarding this modification. TfNSW and Dragonboats have established a protocol for communications and agreed that the land can be utilised by both parties with minimal overlapping operational times for the periods Transport requires it for the project.

Following approval of the REF the residents of 50 Bank Street would be notified of the changed usage of the site including activities and works program expectations.

Impact assessment

Soil

No additional soil or water quality impacts are anticipated. No *additional* safeguards are required.

Waterways and water quality

No additional impacts to waterways and water quality are anticipated. No *additional* safeguards are required.

Noise and vibration

The proposed Bank Street compound is in an area bordered by industrial operations, marine, high-rise residential apartments, recreational, and commercial offices in Pyrmont on the edge of Sydney CBD.

The project REF indicates that the existing background noise levels near the proposed modification are dominated by road traffic noise from the adjacent M1 Motorway Western Distributor and influenced by:

- cumulative construction noise from other major projects including the new Sydney Fish Market
- commercial and industrial activities including the Hymix concrete plant which operates throughout the night.
- other intermittent noise sources including aviation traffic noise.

The nearest residential receivers are residential apartments located on the opposite side of Bank Street about 25 metres to the north of the proposed Bank Street compound site. There are other adjacent residences located on Bowman Street, Distillery Drive and Quarry Master Drive, Pyrmont.

The compound operation would generate additional vehicle movements in Bank Street, Bowman Street and Harris Street during its use for marshalling trucks arriving from the remote Colebee storage yard, gantry pre-assembly, plant and traffic control equipment storage, and limited worker car parking.

The project GateWave construction noise and vibration assessment tool has been utilised to assess the noise impacts during operation of the proposed compound site. Based on the selected noise catchment area, GateWave noise estimator tool produced representative background noise levels (L90) and noise management levels (NML). The distance-based assessment (scenario) was selected for assessment as it considers a number of plant items operating simultaneously during an operational scenario. Potential noise emissions are considered moderately intrusive or clearly audible to nearby residents during standard and non-standard working hours. See Appendix C: GateWave Noise and Vibration Assessment Report for the associated estimated noise impacts.

Per the approved REF all noisy works would be performed under an approved Out of Hours Work (OOHW) permit with adequate stakeholder notification and noisy works (including saw cutting and jackhammering) would cease by 12:00am and may not exceed five consecutive nights per week. Where noise impacts are identified as

intrusive, additional management measures such as verification monitoring and further consultation will be undertaken.

Construction noise impacts would be relatively consistent with the construction noise footprint assessed in the determined REF and subsequent addenda.

The previously determined safeguards are considered adequate to manage these potential noise impacts.

Air quality

The work involves no net increase on that previously assessed. No additional air quality impacts are anticipated. No additional safeguards are required.

Aboriginal heritage

The modification involves work in areas previously assessed and is consistent with the current use by DBNSW under licence to Transport. No Aboriginal sites or places were recorded in or near the location of the WDSM project boundary.

Non-Aboriginal heritage

The modification involves work in areas previously assessed and is consistent with the current use by DBNSW under licence to Transport. No non-Aboriginal sites or places were recorded in or near the location of the WDSM project boundary.

No additional safeguards are required.

Biodiversity

No tree removal or trimming is required for the Bank Street compound establishment or operation. There would be no direct impact to vegetation, the marine environment or aquatic vegetation. Potential indirect impact such as spills would be satisfactorily managed by the existing project REF and subsequent addenda safeguards, and this Addendum REF.

Traffic and transport

Additional traffic and transport impacts would be minor on Bank Street, Bowman Street and Harris Street.

The site would be accessed generally via Bank Street, with an occasional need to approach the site from Harris and Bowman streets.

No additional safeguards are required.

Socio-economic issues

No additional socio-economic impacts are anticipated. No additional safeguards are required.

Landscape character and visual impacts

No additional landscape character and visual impacts are anticipated. The proposed use as a construction compound is consistent with the existing project REF and addenda. No additional safeguards are required.

Waste

The proposed modification would not generate any additional waste as part of the determined project. Any waste would be managed and disposed of in accordance with existing pathways.

No additional safeguards are required.

Cumulative impacts

The proposed modification would result in minor and short-term cumulative impacts in terms of traffic, noise, and lighting.

No additional safeguards are required.

Appendix B addresses the environmental factors specified in section 171 of the Environmental Planning and Assessment Regulation 2021.

Summary of additional or revised safeguards

A summary of additional or revised safeguards to be included as part of this modification are listed in the table below. A complete list of project safeguards as amended is provided in **Table 1**.

Table 1 - Summary of additional or revised safeguards

Safeguards	
Soil	No additional safeguards are required.
Waterways and water quality	No additional safeguards are required.
Noise and vibration	No additional safeguards are required.
Air quality	No additional safeguards are required.
Non-Aboriginal heritage	No additional safeguards are required.
Aboriginal heritage	No additional safeguards are required.
Biodiversity	No additional safeguards are required.
Trees	No additional safeguards are required.
Traffic and transport	No additional safeguards are required.
Socio-economic	No additional safeguards are required.
Landscape character and visual amenity	No additional safeguards are required.
Waste	No additional safeguards are required.
Cumulative impacts	No additional safeguards are required.

Licences, permits or approvals

All relevant licenses, permits, notifications and approvals needed for the Western Distributor Smart Motorway (WDSM) and when they need to be obtained are listed in the determined Western Distributor Review of Environmental Factors (REF) May 2021 and the seven addenda (as determined). These have been included in the approved project Construction Environmental Management Plan (CEMP).

There are no changes to the licencing, permits or existing approvals required as part of this proposed modification.

Conclusion

All relevant safeguards identified in the Western Distributor Smart Motorway (WDSM) Review of Environmental Factors (REF) and the seven addenda, all as determined would be applied to this modification and included work.

There are no additional proposed work activities or impacts requiring major revisions to existing approved project safeguards.

Division 5.1 of the *Environmental Planning and Assessment Act 1979* (EP&A Act) applies to the proposed modification. The proposed modification has been reviewed in the context of the Western Distributor Smart Motorways Review of Environmental Factors and seven addenda as determined which have been considered against the requirements of sections 5.5 and 5.7 of the EP&A Act.

In considering the proposed modification this assessment has examined and taken into account to the fullest extent possible, all matters affecting or likely to affect the environment by reason of that activity as addressed in this memo, and associated information. This assessment is considered to be in accordance with the factors specified in section 171 of the Environmental Planning and Assessment Regulation 2021.

The M1 Western Distributor Smart Motorway Project including the proposed modification described in this memo has manageable environmental impacts which would be satisfactorily mitigated against. Having regard to the safeguards and management measures proposed, it is considered that the expected environmental impacts are unlikely to be significant and a further or revised environmental impact statement is not required under Division 5.2 of the EP&A Act.

The assessment has considered the potential impacts of the activity on the biodiversity values listed under the *Biodiversity Conservation Act 2016* and the *Fisheries Management Act 1994*. The M1 Western Distributor Smart Motorway Project including the proposed modification described in this memo would not significantly affect biodiversity values listed under the *Biodiversity Conservation Act 2016*. Therefore, the concurrence of the Coordinator General of the Environment and Heritage Group of Department of Planning and Environment and a species impact statement or a Biodiversity Development Assessment Report (BDAR) is not required.

In addition to the above, the assessment considered the effect of the activity on:

- Conservation agreements under the *National Parks and Wildlife Act 1974*.
- Plans of management under the *National Parks and Wildlife Act 1974*.
- Biodiversity stewardship sites under the *Biodiversity Conservation Act 2016*.
- Wilderness areas under the *Wilderness Act 1987*.

The assessment has also addressed the potential impacts of the activity on matters of national environmental significance and any impacts on the environment of Commonwealth land and concluded that there would be no significant impacts. Therefore, there is no need for a referral to be made to the Australian Government Department of Agriculture, Water and the Environment for a decision by the Australian Minister for the Environment on whether assessment and approval is required under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) or for application of the EPBC Act strategic assessment for Transport activities assessed under Part 5 of the EPBC Act.

This memo is of adequate quality and meets all relevant requirements.

The proposed modification has been characterised in the context of the M1 Western Distributor Smart Motorway Project and is consistent with that project's objectives and key features. While the proposed modification would increase the overall environmental impacts of the determined project, it is substantially the same as the activity described and assessed in the determined REF and does not constitute an entirely new activity.

Appendix A: Determined minor works refs, determined addenda, and consistency reports

A review of environmental factors (REF) was prepared for the Western Distributor Smart Motorway proposal (referred to as the approved project REF) which was determined in May 2021.

A further seven (7) addendum REFs and two (2) consistency reports have been prepared and determined as described below:

- Addendum assessment and decision No. 1 for proposed modification for the use of auxiliary compound sites at White Bay for the M1 Western Distributor Smart Motorway, December 2022.
- Addendum assessment and decision No. 2 for changes to project boundaries to include five new gantries, minor landscaping, removal of existing traffic signage and additional ITS works for the M1 Western Distributor Smart Motorway, January 2022.
- Addendum assessment and decision No. 3 for the use of an additional construction compound site at Colebee for the M1 Western Distributor Smart Motorway, February 2023.
- Addendum assessment and decision No. 4 for use of an auxiliary compound site at the Glebe Island Bridge eastern approach for the M1 Western Distributor Smart Motorway, April 2023.
- Addendum assessment and decision No. 5 for additional vegetation clearing, modification of the project boundary, works associated with RSC#30 on the western abutment of Anzac Bridge for the M1 Western Distributor Smart Motorway, October 2023.
- Addendum assessment and decision No. 6 for revised position of RSC#16 and RSC#17 for the M1 Western Distributor Smart Motorway, December 2023
- Addendum assessment and decision No. 7 for unrestricted access and hours of use of Glebe Island Bridge eastern approach for the M1 Western Distributor Smart Motorway, April 2024
- M1 Western Distributor Smart Motorway – Review of Environmental Factors consistency review No.01, September 2023 – modifications to project boundaries, variation to works including new gantry structures and ITS connections.
- M1 Western Distributor Smart Motorway – Review of Environmental Factors consistency review No.02, February 2024 - revised position of RSC#25 and modification of the project boundary to accommodate the point of electricity supply for RSC#25.

Appendix B: Environmental Planning and Assessment Regulation 2021 checklist

The following factors, listed in section 171(2) of the Environmental Planning and Assessment Regulation 2021, have been considered to assess the likely impacts of the proposal on the natural and built environment. This consideration is required to comply with sections 5.5 and 5.7 of the EP&A Act.

Environmental factor		Impact
(a)	Any environmental impact on a community? Nil additional impact. All temporary disruptions to the community during construction would be communicated at least 5 business days in advance of the works. Any closures or diversions would be clearly signposted.	Short term only
(b)	Any transformation of a locality? The proposed work would not transform the locality, as works would generally be contained within the existing public roadway.	Nil
(c)	Any environmental impact on the ecosystems of a locality? No potential impact of the local ecosystems would arise from the works. All potential impacts would be managed using the existing project safeguards.	Nil
(d)	Any reduction of the aesthetic, recreational, scientific, or other environmental quality or value of a locality? The proposal would not reduce the aesthetic, recreational, scientific, or other environmental quality or value of the locality. Works are within the existing project boundary or within the minor extension contained within the existing road formation. Stakeholders impacted by the proposal would be adequately consulted with	Nil
(e)	Any effect on a locality, place or building having aesthetic, anthropological, archaeological, architectural, cultural, historical, scientific, or social significance or other special value for present or future generations? The proposal would not impact on a locality, place or building having any listed value above or other special value for present or future generations. All potential impacts would be mitigated against using existing project safeguards.	Nil
(f)	Any impact on habitat of any protected animals (within the meaning of the Biodiversity Conservation Act 2016)? The proposal would not have any impact on the habitat of protected animals with appropriate safeguards being implemented to mitigate potential risks	Nil
(g)	Any endangering of any species of animal, plant or other form of life, whether living on land, in water or in the air? The proposal would not endanger any species of animal, plant, or other form of life, whether living on land, in water or in the air and appropriate safeguards would be implemented prior to mitigate risks	Nil
(h)	Any long-term effects on the environment? The proposal would have positive long-term effects on the environment due to improved customer journey experience including road safety. There are no	Nil

	anticipated negative long-term effects on the environment from any maintenance arising.	
(i)	Any degradation of the quality of the environment? The proposal would have minimal adverse impact on the quality of the environment. Potential impacts would be mitigated against through implementation of the safeguards.	Nil
(j)	Any risk to the safety of the environment? No unacceptable risks posed to the safety of the environment potentially arising from the works. The potential impacts would be mitigated against through the implementation of the safeguards.	Nil
(k)	Any reduction in the range of beneficial uses of the environment? During construction the use of the land and permitted work areas would be limited because of construction activities and safety considerations. The proposed modification would have no long-term impact on any beneficial uses of the environment.	Nil
(l)	Any pollution of the environment? The proposed works would not result in pollution of the environment. Potential risks would be mitigated via the implementation of the safeguards.	Nil
(m)	Any environmental problems associated with the disposal of waste? The proposed works would not generate extensive wastes different to those already managed on the project. Any waste generated during the works would be managed and disposed to approved and licenced recycling or landfill facilities. Potential risks would be managed via the implementation of the safeguards.	Nil
(n)	Any increased demands on resources, natural or otherwise which are, or are likely to become, in short supply? The modification is a minor extension of works similar in nature to the approved project works and no further impact would arise. Potential risks would be managed via the implementation of the safeguards.	Nil
(o)	Any cumulative environmental effect with other existing or likely future activities? The proposed modification is minor in nature and would not pose risk to cumulative project or environmental impacts. The potential impacts on the environment would be minimised by risk mitigation through implementation of the safeguards.	Nil
(p)	Any impact on coastal processes and coastal hazards, including those under projected climate change conditions? Nil additional impacts on coastal processes and coastal hazards, including those under projected climate change conditions.	Nil

(q)	Any impact on applicable local strategic planning statements, regional strategic plans or district strategic plans made under the Act, Division 3.1? The proposed works are similar in nature to those previously determined as part of the project approval. No new works are being introduced. There is no impact to applicable planning legislation or regional plans. For further information on the applicable plans refer to Regional and district plans (nsw.gov.au) website.	Nil
(r)	Any impact on other relevant environmental factors? Nil additional impact to other environmental factors has been identified through the preparation of this modification and during development of the proposed activities.	Nil

Western Distributor Smart Motorway – Anzac Bridge to Warringah Freeway Noise and Vibration Assessment Report

1 Introduction

The Renzo Tonin and Associates web-based construction assessment tool (Gatewave) has been used to prepare this noise and vibration assessment report for Smart Link Alliance and the Western Distributor Smart Motorway – Anzac Bridge to Warringah Freeway project (the Project).

The overall noise and vibration impacts from the Project works and associated mitigation measures (e.g. hoardings) have already been addressed in the Project's Noise and Vibration Impact Assessment as part of the Review of Environmental Factors. This tool allows specific work areas and activities to be assessed as construction works progress. It also allows cumulative noise impact from other aspects of the Project or, where relevant noise from other construction projects, to be assessed and managed in accordance with the Project's Noise and Vibration Management Plan (NVMP).

2 Assessment methodology

2.1 Construction noise

Results for the assessment of airborne noise were determined using a CadnaA computer noise model developed for the Project. The CadnaA noise model incorporates ground elevation contours, building heights, the built environment and atmospheric conditions to predict construction noise in accordance with the International Standard ISO 9613-2:1996 implementing quality standard ISO 17534-1:2015.

Results from the CadnaA noise model are exported and stored into the Gatewave database which allows for the prediction of the total cumulative noise from all construction activities.

A summary of the noise calculation parameters is detailed in Table 1.

Table 1: Summary of noise modelling parameters

Parameters	Inputs
Calculation method	ISO 9613-2:1996 implementing quality standard ISO 17534-1:2015
Location of noise sources above the local ground	1.5m
Height of receivers	1.5m above ground level to represent 1.5m above ground floor level Additional 3m height for every additional floor assessed (i.e. 4.5m above ground for first floor, 7.5m for second floor etc.)
Sound Power Levels (L_w) of plant and equipment	All L_w data obtained from Renzo Tonin & Associates database Detailed in Section 3
Construction activities	Detailed in Section 3
Ground absorption	Varying from 1 for absorptive surfaces (e.g. park land), 0.5 (e.g. residential areas) to 0 for reflective surfaces (e.g. water, concrete, paving);
Noise barriers and screening	As detailed in Project NVIA

2.2 Construction vibration

The plant and equipment considered in this scenario are not considered vibration intensive. As a result, minimum working distances (MWDs) for cosmetic damage or human annoyance have not been nominated.

3 Construction activities, work areas and NCAs

3.1 Justification to complete the works OOH

Refer to SWC OOHW Permit for details.

3.2 Construction activities

3.2.1 Plant and equipment use

A summary of the plant and equipment operating during each assessment time period is presented in Table 2. Note that Table 2 identifies if a plant/equipment item is used for part or all of the assessment period on a given day, and does not necessarily denote if the plant/equipment are operating concurrently (refer APPENDIX A for details on which plant/equipment are operating together).

Table 2: Proposed construction activities and associated sound power levels

Activity/plant/equipment	Number in use				Sound power level, dB(A)		High impact item	Noise reduction from mitigation measures, dB(A)
	Day	Day (OOH)	Evening	Night	Leq	Lmax		
Bank St Construction Compound								
Excavator w bucket (5t)	1	-	1	1	103	108	-	-
Tipper	1	-	1	1	103	111	-	-
Light vehicles	2	-	2	2	92	100	-	-
EWP	2	-	2	2	98	98	-	-
Hand tools	1	-	1	1	107	111	-	-
Delivery truck	1	-	1	1	106	111	-	-
Mobile crane (20t-250t)	1	-	1	1	104	108	-	-
Side loaders / trailers	1	-	1	1	106	111	-	-
Vacuum truck	1	-	1	1	107	111	-	-

Notes:

- 1) Refer APPENDIX A for plant/equipment timings and to identify which items operate concurrently.
- 2) Equipment marked in **orange** are not verified by Renzo Tonin and Associates

The locations of the construction activities are presented in Figure 1.

Figure 1: Construction work areas

4 Construction noise and vibration impacts

4.1 Predicted noise levels

4.1.1 Construction $L_{Aeq,15min}$ assessment

Noise levels were determined by modelling the noise sources, receiver locations, and operating activities, based on the information presented in Table 2.

The noise predictions presented in this report represent a realistic worst-case scenario when construction occurs at the closest location within a specific work area. At each receiver, noise levels will vary during the construction period based on the position of equipment within the work area, the distance to the receiver, the construction activities being undertaken and the noise levels of particular plant items and equipment. Actual noise levels will often be less than the predicted levels presented.

A summary of the results is presented in Table 3. NMLs and predictions for the three worst-affected receivers for each works area are provided in Table 4. Detailed noise results including additional mitigation measures are provided in APPENDIX B and presented visually in noise maps in APPENDIX C.

Table 3: Summary of receivers above relevant NMLs

NCA	Day		Day (OOH)		Evening		Night	
	dB(A) above NML	No. of properties	dB(A) above NML	No. of properties	dB(A) above NML	No. of properties	dB(A) above NML	No. of properties
NCA05	0 to 10	0	0 to 5		0 to 5	0	0 to 5	0

4.2 Predicted vibration levels

The plant and equipment described in Table 2 are not considered vibration intensive and, as a result, do not have MWDs for cosmetic damage or human annoyance.

4.3 Mitigation measures

4.3.1 Specific reasonable and feasible mitigation measures

Refer to SWC OOHW Permit for details.

4.3.2 Additional noise mitigation measures

In accordance with the CNVG, where, after application of all reasonable and feasible mitigation measures, the $L_{Aeq(15\text{minute})}$ airborne construction noise levels are still predicted to exceed the NMLs, additional airborne noise mitigation measures can be applied to further limit the risk of annoyance from construction noise.

Figure 2 presents a summary of the additional noise mitigation measures applicable for construction activities where, after application of all reasonable and feasible mitigation options, construction noise levels still exceed the NMLs.

Figure 2: Additional airborne noise mitigation measures

When is the work being undertaken?	How much does the predicted noise level exceed the ANML by?	Identify additional management measures to be implemented	Additional mitigation measure code
All Hours	75 dB(A) or greater	V, N, PC, RO	AM2
Standard Hours M-F 7am to 6pm Sat 8am to 6pm	0 dB(A)	-	-
	≤ 10 dB(A)	-	-
	10 to 20 dB(A)	V, N	AM1
	> 20 dB(A)	V, N	AM1
OOHW Period 1 M-F 6pm to 10pm Sat 6pm to 10pm Sun/ PH 8am to 10pm	< 5 dB(A)	-	-
	5 to 15 dB(A)	N, R1, DR	AM3
	15 to 25 dB(A)	V, N, R1, DR	AM4
	> 25 dB(A)	V, N, SN, IB, PC, R1, DR	AM5
OOHW Period 2* M-F 10pm to 7am Sat 10pm to 8am Sun/ PH 6pm to 8am	< 5 dB(A)	N	AM6
	5 to 15 dB(A)	V, N, R2, DR	AM7
	15 to 25 dB(A)	V, N, SN, IB, PC, R2, DR	AM8
	> 25 dB(A)	AA, V, N, SN, IB, PC, R2, DR	AM9

Notes: Use the abbreviation codes in the table above to confirm management measures required

* Where OOHV occur in the evening/night shoulder period (10pm to 12am) or the night/morning shoulder period (5am to 7am) apply additional airborne mitigation measures from the OOHV Period 2, excluding AA.

N = Notification (should be issued a minimum of five working days prior to the start of works)

SN = Specific notifications (issued no later than seven calendar days ahead of construction activities)

IB = Individual briefing

PC = Phone Call

AA = Alternative accommodation**

RO = Project specific respite offer

R1 = Respite period 1

V = Verification of predicted noise

DR = Duration respite

R2 = Respite period 2

** Where construction activity impacts receiver for more than two consecutive nights, AA is not applicable to shoulder periods.

4.3.3 Noise monitoring plan

Attended noise monitoring is to be undertaken to verify that noise levels resulting from works are in accordance with the levels predicted in this noise and vibration assessment report, subject to obtaining

the property owner/occupier's consent to access the property (where required). Noise monitoring should be carried out on or near the property boundary at a location representative of the worst affected location (i.e. in publicly accessible areas on or near the nominated receivers, typically at ground level).

Table 4 identifies potential monitoring locations in each NCA, which are the three worst noise-affected receivers for each NCA from the works.

Note: Gatewave tries to find the most affected receivers in each NCA (up to 3 locations) purely based on the numerical results. These locations will be reviewed for suitability based on safety, accessibility, will provide valid data, etc. If not suitable, alternative suitable locations will be selected for verification monitoring.

If monitoring levels exceed predicted levels, continual improvement and corrective action measures will be implemented, (e.g. investigate cause, review work or activity, scheduling, etc).

Table 4: Nominated verification monitoring locations

Receiver			Noise management levels (NMLs), dB(A)				Sleep disturbance goals, dB(A)		Predicted noise levels, dB(A) Leq,15min				Predicted noise levels, dB(A) Lmax

4.3.4 Vibration monitoring

As the plant and equipment in this scenario are not considered to be vibration intensive, further vibration monitoring is not required.

If attended vibration monitoring is required (for example, in response to vibration-related complaints), monitoring will be undertaken according to the process described in the NVMP.

Vibration monitoring should follow the procedures outlined in Appendix F of the CNVG.
