

Transport for NSW

Safer and smarter journeys are coming to the Western Distributor

Travelling eastbound on the Anzac Bridge

An update about the Western Distributor Smart Motorway

The Western Distributor Smart Motorway will increase network resilience, improve travel time and reliability, improve traffic safety and enhance the road user experience.

Since mid-2023 we have been working to install communications, electrical cables and control cabinets in preparation for new signs and smart motorway technology on the Western Distributor.

Over the coming months, you will start to see the new signs on the motorway, between Anzac Bridge and Sydney Harbour Bridge. We are also installing electronic and static signage onto the existing sign bars on the Anzac Bridge. While we install the new signs there will be temporary traffic changes on the Western Distributor during our shifts.

At times sections of the Western Distributor may be closed in both directions to install gantries and signage. We will complete most of our work at night, when traffic is at its lowest and detours will be in place at times. Please drive to the conditions and for the latest traffic updates, visit **livetraffic.com**, download the Live Traffic NSW App or call **132 701**.

We share regular construction updates about our work. If you would like to receive these updates please register at **nswroads.work/smartwestdistributor** or scan the QR code.
