

Crowdy Head Boat Harbour

Submissions Report released and planning approval received.

February 2024

The NSW Government is delivering major improvements to maritime infrastructure and facilities state-wide, to help the boating and wider community safely access, use and navigate our inland and coastal waters.

Submissions Report now available and planning approval received.

In June 2022, Transport for NSW (Transport) invited the community and stakeholders to have their say on the Review of Environmental Factors (REF). Thank you to everyone who provided feedback during this time.

Planning approval has been received and we are proceeding with plans to upgrade Crowdy Head Boat Harbour.

About the upgrade:

The project includes the demolition and replacement of Jetty 1, and includes:

- new heavy duty floating pontoons
- water and electricity to each berth
- 18 berths of various sizes
- one temporary or short term berth
- demolition of Jetty 2
- dredging of the harbour

Benefits of the upgrade:

- improved accessibility and safety for vessels using Crowdy Head Boat Harbour
- increased safety for users of the harbour by upgrading infrastructure to meet modern design standards and requirements
- improved community access and use of the harbour

Key feedback topics

A total of 47 submissions were received in response to the display of the REF.

The key feedback topics raised during public display included:

- the need for a fishing platform to replace Jetty 2
- concerns for the floating pontoon in surging conditions
- requests for the dredging area to be extended
- community access to Jetty 1

47 Submissions received

2 community information sessions held

2,160 community updates distributed

Design update

In response to submissions received, Transport has made the following changes to the design:

- increased dredging area to take into consideration the area near the boat ramp
- a design for a replacement fishing platform has been developed and we are exploring additional funding options
- updated structural details following detailed engineering study.

Next steps

Pending further approvals and confirmation of funding, construction is expected to begin in mid to late 2024 and take about 10 months to complete (conditions permitting).

We will notify the community before starting work.

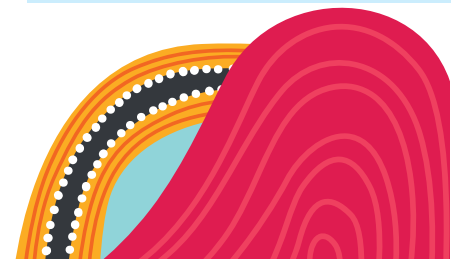

Thank you

Thank you to everyone who took the time to respond and make submissions.

Following consultation on the REF, Transport for NSW has prepared a Submissions Report. We have reviewed and considered every submission, and the report details our response, including key changes made to the project as a result of your feedback. It also provides answers to the questions you asked us, and an update on the outcomes of additional investigations conducted in the past months.

The Submissions Report is now available on the project website at nswroads.work/crowdyhead
