

# Nightworks on Great Western Highway at Little Hartley from 28 July 2024

## Coxs River Road Upgrade

July 2024

Transport for NSW acknowledges people of the Wiradjuri Nation as the Traditional Custodians of the lands on which we work and pays respects to Elders past and present.

The Coxs River Road upgrade will reduce congestion and improve safety and accessibility for all local and highway road users, commuters and pedestrians.

Transport for NSW's lead contractor, Ertech is continuing works at Little Hartley for the Coxs River Road Upgrade.

### What work are we doing?

We will be undertaking investigative works including:

- core sampling
- surveying
- barrier placement at the western end of the works.

These works are important to enable the completion of the Service Road and construction of the tie-in works at the western end of the project, near Mid Hartley Road.

### When and where we'll be working

We will be working along the Great Western Highway, between Mid Hartley Road and Coxs River Road.

We will be working over **three nights between 28 July and 31 July**, weather permitting.

We will be working at night between 7pm and 5am.

### What will this mean for you?

Most of this work will have minimal impact on residents. However, you may notice:

- light from lighting towers
- noise from machinery and equipment
- plant movement in and out of the project site.

### Managing our impacts

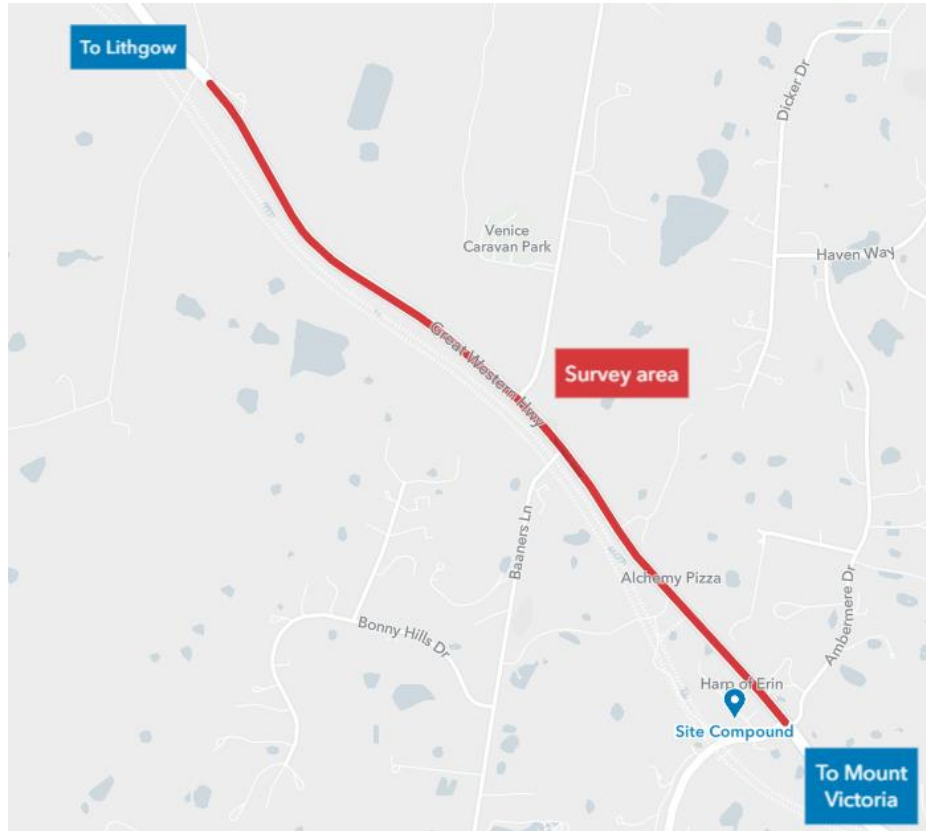

We aim to manage our work to minimise impacts to the community and the environment.

This includes:

- fencing work areas for safety and security
- controlling light spill to ensure it has minimal effect on properties
- reducing our noise as much as possible by working in stages and turning off machinery when not in use
- monitoring and maintaining our environmental controls during and after high rainfall events.

## Location of work area

## Traffic changes

Traffic control, lane closures, and reduced speed limits to 40km/h will be in place where works are being undertaken. All road users are advised to follow the directions of signs and traffic control and slow down on approach.

For the latest traffic updates, call 132 701, visit [livetraffic.com](http://livetraffic.com) or download the Live Traffic NSW App.

We understand that this work may cause some inconvenience and we thank you for your patience.
