

Newtown to Redfern Signalling Upgrade

More Trains, More Services

April and May 2024

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

More Trains, More Services program is designed to simplify and modernise the rail network. Passengers will be able to access more services on a simpler and more reliable network through the delivery of better infrastructure, new trains and extra services.

This project will upgrade the rail signalling infrastructure between Newtown and Redfern stations to improve train movements through the stations.

What work are we doing?

We are installing a new structure that will stretch across the railway tracks and carry signals (similar to traffic lights). The location of the structure is shown on the map overleaf.

In April and May 2024, we will continue assembling the new structure, installing ladders and posts.

When we'll be working

Standard construction hours are between **7am and 6pm Monday to Friday** and **8am and 1pm on Saturdays**.

For safety reasons, some work will take place during scheduled Sydney Trains trackwork periods from:

- **10pm Friday 19 April to 2am Monday 22 April 2024**
- **10pm Friday 10 May to 2am Monday 13 May 2024.**

This is the last paper notification you will receive from us

After April 2024, we will no longer distribute paper notifications (unless requested) to reduce our environmental impacts.

Instead, we will contact you via email when there is work that may impact you.

If you haven't already registered, please scan the QR code and click 'Register now'.

If you wish to continue to receive paper notifications, you can request this via the QR code or call us at **1800 684 490**.

Thank you to residents who have already registered.

Temporary parking changes on Copeland Avenue

Around seven parking spaces will be temporarily unavailable near the rail access gate on Copeland Avenue from **5pm Friday 19 April to 6pm Sunday 21 April 2024** as shown on the map overleaf.

This is to ensure there is sufficient room for machinery to access the work area. We apologise for any inconvenience this may cause and thank you for your patience.

Location of work and parking changes

What will this mean for you?

In addition to the temporary parking changes on Copeland Avenue, you may notice:

- traffic control
- an increase in workers and vehicles
- noise from machinery and equipment
- lighting from temporary lighting towers.

Managing our impacts

We understand our work may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

Please note, there may be other contractors working in the Newtown rail corridor.

An indicative design drawing of the new signalling structure

What's next?

Work to install and commission the new structure will continue throughout 2024. If you would like to continue to receive updates about our work as it progresses, please make sure you register for updates via the QR on the front or below if you haven't already.

If you have any questions or would like more information, please contact us via the avenues below.
