

Sydenham Bus Layover

Review of Environmental Factors

Bus Priority Infrastructure Program

August 2024

Transport for NSW acknowledges the Gadigal of the Eora Nations as the Traditional Custodians of the lands on which we work and pays respects to Elders past and present.

The NSW Government is proposing a new bus layover at the corner of Railway Road and Burrows Avenue in Sydenham to improve the reliability and efficiency of bus services, while easing congestion for all road users.

Artist impression of the layover on Burrows Avenue, including the driver amenity block – the noise wall would feature artwork by an aboriginal artist, which we will seek feedback on in the coming months

Transport for NSW have refined the proposed bus layover design and we welcome your feedback on the updated design and Review of Environmental Factors.

Key features

The layover has been designed for buses to enter from Railway Road and exit onto Burrows Avenue and will include:

- six bus parking spaces
- a dedicated driver amenity block with a lunchroom and toilets
- a noise wall between residential properties and the layover to minimise noise impacts
- a pedestrian walkway along the eastern side of the layover with a fence to separate pedestrians from the layover area
- landscaping.

Have Your Say

Review of Environmental Factors (REF)

The REF outlines the design features and details how we plan to manage and minimise potential impacts.

The REF is on public display until **midnight Monday 9 September 2024**.

Bus layover design - with refinements

Landscaping

Landscaping would include three new trees to be planted next to the driver amenity block, and one new tree be planted in the green space next to the driveway entrance.

The area around the driver amenity block will be planted with native grasses, and native shrubs will be planted next to the entrance on Railway Road.

The shrubs and trees will be selected for their hardiness, drought and heat resistance, and suitability for the local microclimate, subject to approval by Inner West Council and availability.

Artwork

The noise wall would feature artwork designed by an Aboriginal artist. We will seek feedback on the design in the coming months.

Parking

The angled parking on Railway Road will be signposted as rear to kerb, subject to Council approval. This provides an additional parking spot over the previous design.

Next steps

Following approvals, construction is scheduled to start in late 2024 and is expected to take up to seven months to complete, weather permitting.

We will provide regular updates to the community as the project progresses.
