

August community update

Tuggerah Station Upgrade

July 2024

Transport for NSW acknowledges the Darkinjung people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The NSW Government is improving accessibility at Tuggerah Station

Transport for NSW is upgrading Tuggerah Station. The upgrade will provide a train station that is safe, inclusive and easy to use for all passengers - especially people with disability, older people, people with prams or luggage and others who might be experiencing mobility problems.

What we are doing in August 2024?

Work includes:

- general construction works, including delivery and removal of plant and materials
- adjustments to hoarding and fencing to facilitate construction works
- formwork, reinforcement and concrete pours
- crane movements to assist with construction
- earthwork activities including waste classification and removal of waste materials
- installation of utility connections for the station
- demolition and excavation work and associated truck movements for import and export of materials.

We will use various items of equipment, including cranes, excavators, jack hammers, trucks including tipper, flat tray track and hiab, elevated work platform, concrete trucks and concrete pumps, powered and manual hand tools.

Drivers will continue to see construction vehicle movements and traffic control on Pacific Highway and Anzac Road.

When we'll be working

Standard construction hours are **7am to 6pm Monday to Saturday**. We will notify nearby residents and businesses in advance if we need to work outside these times.

Out of hours

From **7am Saturday 3 August to 7am Monday 5 August 2024**, additional plant movements will occur in the Bryant Drive commuter car park during a planned Sydney Trains trackwork weekend when the station is closed and trains will not be running.

Work involves the excavation of trenches, in preparation for the installation of new station services.

Cranes will be operating in the car park for steelwork installation for the new station structure and drainage installation will be carried out in the Kiss & Ride area.

Machinery being used includes cranes, concrete trucks, heavy plant, and powered hand tools.

This work will be undertaken on the weekend when the station is quieter for less community disruption, however it will generate some noise and inconvenience. Please note that there will be no access to toilets at the station on this weekend.

Changes to the commuter carpark

During August, there will be continued temporary changes to car parking arrangements at Tuggerah Station to allow for construction work.

We will be temporarily removing twelve parking spots and six accessible parking spots from the commuter car park on Bryant Drive.

Additional accessible parking spots are available in the adjacent council car park. Signage is in

place to direct drivers.

The area will be utilised for a lay down area for structural steelwork preparation work between **2 August to 5 August 2024** and the ramp demolition later this year.

Changes to Kiss & Ride

There will be reduced parking at the Kiss & Ride drop off area in August to facilitate deliveries and construction work Bryant Drive side.

Managing our impacts

A traffic control team will be available to assist with any impacts to pedestrian movements.

This work may be noisy, however we aim to avoid impacts to the community and the environment where possible by:

- fencing off areas for the safety of commuters
- using noise blankets and turning off machinery and equipment when not in use.

Thank you for your patience as we carry out this important work.

New footbridge connecting the platforms.
