

Waterfall Stabling Yard and Platform Extension Project

June - July 2024

Transport for NSW acknowledges the Dharawal people of the Dharawal Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The More Trains, More Services program is designed to simplify and modernise the rail network, delivering a range of benefits for rail customers through better infrastructure, new trains and extra services.

What work are we doing?

In June and July 2024, we will be completing the following work:

- construction of new, replacement track
- installation and testing of new signalling systems
- construction of corridor access roads, elevated staff access platforms and footpaths, requiring use of a vibratory roller
- resurfacing of extended platform and reinstatement of tactiles
- installation of new drainage and cabling infrastructure, including sewer and water connection work
- relocation of signalling infrastructure
- removal of low and high voltage poles and associated infrastructure
- installation of new light poles and CCTV cameras
- installation of tactiles and handrails
- removal of redundant overhead wiring infrastructure
- installation of remaining security fencing around the new staff amenities building
- completion work on the new footbridge

- vegetation removal inside the rail corridor. Vegetation removal will be offset in accordance with Transport for NSW's Vegetation Offset Guide.

When and where we'll be working

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am until 1pm on Saturdays**.

Work will be undertaken in and adjacent to the rail corridor at Waterfall.

Out of hours work

In June, some work will be required to take place outside of standard construction hours between **6pm Friday 21 June and 7am Monday 24 June**.

In July, we will be working around the clock over a two-week period, from **10pm Wednesday 3 July to 6am Monday 15 July**. This work is required to enable safe signal testing while train services are running at a reduced capacity for maintenance activities.

Why we work outside of standard construction hours

We schedule work outside of standard construction hours to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our workers and customers.

Waterfall and Heathcote stations, service impact

Between **Saturday 6 July and Sunday 14 July**, there will be changes to train services between Sutherland and Thirroul stations. Train services will not be stopping at Waterfall and Heathcote Stations during this time, and replacement buses will be in operation.

For up to date information about services, please visit transportnsw.info or call **131 500**.

Temporary changes to commuter car parking at Waterfall and Heathcote

To support construction activities, some commuter car parking spaces will be unavailable in June and July.

Between **5pm Monday 17 June and 5pm Friday 19 July**, some commuter car spaces will be unavailable at Waterfall to enable construction activities to be safely carried out.

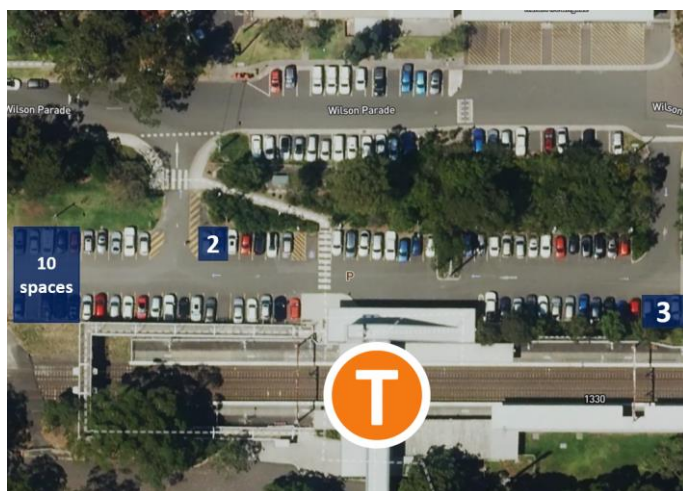

Traffic control and site signage will be installed to assist with these temporary changes.

Other agencies will be working at Waterfall Station during this time and additional commuter car parking spaces will be reserved, including for the safe operation of replacement bus services.

Limited parking will be available at Waterfall Station between **Monday 17 June and Friday 19 July**. Commuters are encouraged to plan ahead, allow additional travel time and consider alternate parking arrangements.

For up-to-date information about services during these times, please visit transportnsw.info or call **131 500**.

Between **6am Friday 5 July and 6pm Monday 15 July**, 15 commuter car spaces will be unavailable at Heathcote Station off Wilson Parade to enable safe construction vehicle access into the rail corridor.

What will this mean for you?

You may notice:

- traffic controllers and signage
- noise from machinery and equipment
- deliveries of equipment and materials.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
