

Rail Service Improvement Program

Arncliffe to Tempe

June 2025

Transport for NSW acknowledges the Gweagal, Bidjigal and Gadigal Clans for the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Rail Service Improvement Program enables a safer, more equitable, and integrated transport network where people can travel more safely, reliably, and efficiently across NSW.

What work are we doing?

Several infrastructure improvements are currently being delivered in your area as part of the Arncliffe to Tempe Signalling Upgrade project.

In June, we will be:

- installing and terminating signalling and communication cables
- Installing cable route
- installing signalling infrastructure, including signals, airline and automatic train protection equipment
- pre-testing and wiring in signalling equipment
- installing and commissioning track circuits
- Other minor construction activities including site set ups, inspections and general site surveys.

When and where we'll be working

Work will take place within the rail corridor from Arncliffe station to city-side of Tempe station. We will also be working at our site compound adjacent to the rail corridor between Arncliffe and Tempe.

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Out of hours work

Due to safety requirements, some work is required to take place outside of standard construction hours. This work will take place between

- **6pm Monday 9 June and 6am Thursday 12 June**
- **6pm Wednesday 25 June and 6am Wednesday 2 July.**

Please note other agencies will be working in the area.

What will this mean for you?

You may notice:

- an increase in workers and construction vehicles
- increased noise from machinery and equipment.

Managing our impacts

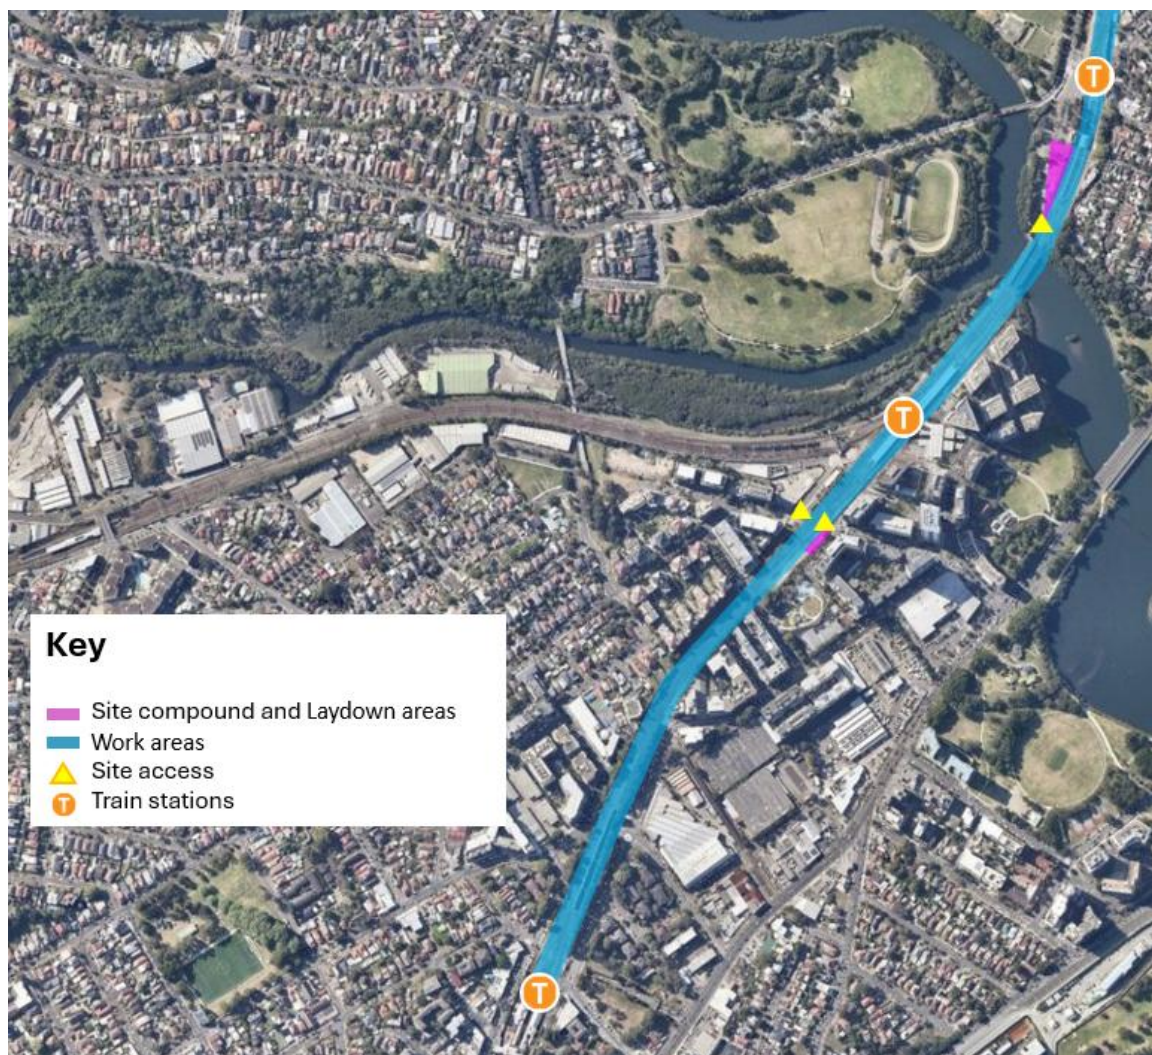

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise impacts where possible, including:

- locating equipment as far away from residents and businesses as possible
- compliance with strict environmental conditions relating to noise.

Location of work areas

Please note these maps are indicative only and not to scale. Temporary laydown areas along the rail corridor will be used for deliveries, storage of materials and equipment, worker briefings and parking.
