

Griffith Station upgrade is complete

Community notification

August 2025

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government has upgraded accessibility at Griffith Station. This upgrade was delivered as part of the Safe Accessible Transport program, an initiative that delivers a station precinct that is accessible to people with a disability, limited mobility, parents/carers with prams and passengers with luggage.

Overview

We are pleased to announce that the accessibility upgrade at Griffith Station is complete.

We carried out consultation with the community and key stakeholders, which helped us deliver:

- new landscaping in and around the station
- a new accessible parking space and kiss and ride zone
- a new shelter with canopy, accessible seating and wheelchair space
- new accessible ramps and staircase for station access
- new accessible bench seating along the station platform
- a new boarding assistance zone
- upgraded lighting, wayfinding and closed-circuit television (CCTV) across the station precinct.

Thank you for your contributions

Key stakeholders and members of the community shared their experiences of accessibility at Griffith Station before plans were finalised. We considered this feedback as part of the detailed design process for the station upgrade, which helped us deliver a station that works for the community.

Heritage is a key element

The original Griffith Railway Station was operational from 1916 to 1935, when it was replaced by the current station building.

We were careful to keep in mind the heritage status of Griffith Railway Precinct, which is protected under the NSW Heritage Act (1977).

Griffith Station is also listed on the Transport Asset Holding Entity Heritage and Conservation Register, the Country Rail Network (CRN) Heritage and Conservation Register, and the Griffith Local Environment Plan.

All elements of heritage significance were retained as part of this project. Any scope impacting heritage elements was considered and mitigated, such as the restoration of the original fireplace that was constructed in 1935.

Work began at Griffith in November 2024 and was completed in 10 months. Steps were taken to ensure commuters and our workers were kept safe for the duration of the upgrade.

Thank you

Thank you to the Traditional Custodians, station staff, customers, local residents, businesses and our delivery contractors for their cooperation and patience. We acknowledge that work may have been inconvenient at times, and we thank the community for their patience and understanding. We hope that everyone, especially passengers with disability, limited mobility, parents/carers with prams and passengers with luggage, will have an improved experience when catching the train at Griffith Station.

Almost 10,000 hours worked

Over 100 people worked on the upgrade

More than 30 suppliers used from the local area
