

Kamay wharves

Temporary vessel berthing

February 2025

- The berthing area is fixed, accessible, and slopes downward to provide berthing areas at all tidal states.
- The number of vessels that can berth at any one time is dependent on the tide, length of the vessel and freeboard, and where passengers will disembark.
- Recreational and commercial vessels have dedicated berthing facilities on one side of the wharf.
- Vessels can berth for a **maximum of 15 minutes** and drivers **must stay with their vessel** while berthed.
- Vessel limits are up to **20 metres in length**, with **1.8 metre draft** and **55 tonne displacement**.
- There are currently no booking requirements for berthing; the 15-minute time limit will help to provide turnover and shared access.
- Unpowered watercraft, such as kayaks and windsurf boards, can be launched from the wharf berth when not in use by vessels.
- Be careful of **changing tide levels and ocean conditions**, as well as **slippery surfaces**.
- Vessels should only berth during safe wind and sea conditions.

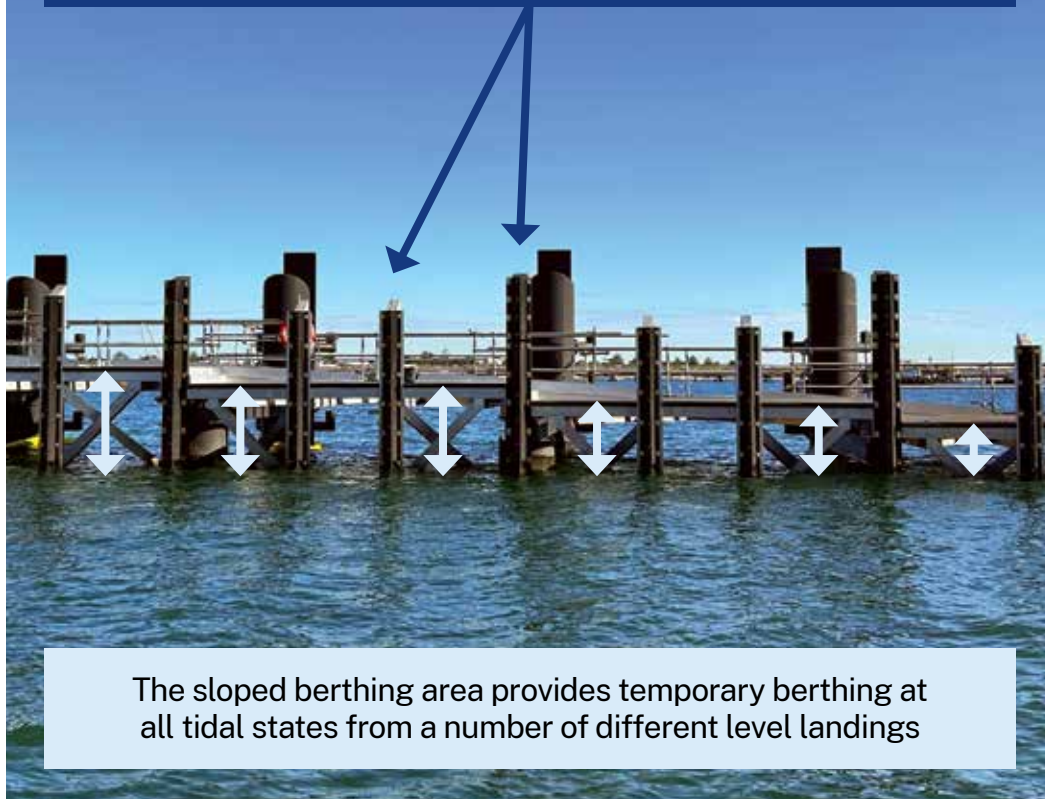

Berthing location at Kamay Wharf Kurnell

Berthing location at Kamay Wharf La Perouse

Primary and secondary fenders on recreational berth to allow for different sized vessels

The sloped berthing area provides temporary berthing at all tidal states from a number of different level landings

Recreational and commercial vessels can tie on to 350mm aluminium double horn cleats bolted to the deck

Non-slip grated mesh

*Images of the berthing area during construction. Note the temporary handrail pictured on the edge of the structure will be removed for operation.
For illustrative purposes only, not to scale.*
