

Site investigation work in your area

Safe Accessible Transport program

August 2025

Transport for NSW acknowledges the Dharug and Gadigal people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government is improving accessibility and safety at Lewisham Station.

Planning is underway to improve Lewisham Station under the Safe Accessible Transport program, which aims to make public transport safe, inclusive and easy to use for all passengers, especially people with disability, elderly, people with prams or luggage and others who may be experiencing mobility problems.

What work are we doing?

We are planning to undertake drainage investigation work to inform further project development.

Work includes:

- Removing drain covers or grates to enable investigations of drainage pits and stormwater pipes at four locations in and around the station
- Undertaking investigations using a CCTV drain camera
- Re-covering and tidying up any testing locations.

When and where we'll be working

We will be carrying out work in the station underpass and along Victoria Street for one evening, **between 8pm and 4am**. The work is scheduled for **Monday 11 August**, but may be postponed in the event of poor weather.

Work is scheduled to occur during the evening period to reduce the impact on the community and passengers, and is not expected to generate much noise.

What will this mean for you?

You may notice:

- workers and up to two vehicles around the station and workers undertaking investigations in the station underpass and along Victoria Street
- traffic control and signage
- short-term parking impacts
- minor noise from equipment.

Temporary parking impacts

One parking space will be temporarily unavailable on Victoria Street, near Railway Terrace, to facilitate investigations in the station underpass. The space will be released as soon as work is complete.

An additional site vehicle carrying equipment will be parked next to drainage pits along Victoria Street to enable investigation work.

Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment. This work is designed to minimise impact.

This includes:

- reducing our noise as much as possible
- turning machinery and equipment off when not in use
- releasing parking spaces as soon as they are no longer needed.
