

# Additional night work along Elizabeth Drive, Badgerys Creek

## M12 Motorway – West

July 2025

Transport for NSW acknowledges the Dharug people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Australian and NSW governments are building the M12 Motorway to provide direct access to the Western Sydney International Airport at Badgerys Creek and connect to Sydney's motorway network.

### What work are we doing?

Transport for NSW will continue night work to complete road resurfacing work along Elizabeth Drive and the Badgerys Creek Road intersection, Badgerys Creek.

Our work includes:

- profiling (smoothing out the road surface)
- cleaning and sweeping the road
- laying asphalt
- applying temporary line marking
- installing barriers to improve road safety until permanent line marking is complete.

### When we'll be working

We will work for seven nights between **Monday 14 July 2025** and **Wednesday 23 July 2025**. Our work will take place from **8pm to 5am**. There will be no work on Sundays or public holidays.

### What equipment will be used?

Equipment will include lighting towers, paving equipment, light and heavy vehicles, rollers, road profilers and construction and traffic control equipment.

### What will this mean for you?

You may see increased activity in the area.

You may notice:

- workers and vehicles
- traffic controllers and signage
- reduced speed limits
- noise from machinery and equipment.

Lane closures will be in place during this work. See the map over the page for more information on the work location and traffic changes.

Please plan your journey, follow signs, adhere to speed limits, and follow the direction of traffic controllers.

### Managing our impacts

Some work may be noisy at times; however, we will minimise impacts by:

- not working more than two nights in a row in the same location
- completing noisier activities earlier in the night where practicable
- turning off equipment and machinery when not in use
- using real-time noise monitoring to track noise levels.

We will contact directly impacted residents about this work.
