

## Safety improvement work at the intersection of Moore-Oxley Street and Broughton Street, Campbelltown from Sunday 1 June 2025

### Community Notification

May 2025

Transport for NSW acknowledges the Dharawal people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Transport for NSW is improving pedestrian safety at the intersection of Moore-Oxley Street and Broughton Street, Campbelltown. This work is being completed as part of the Road Safety Program.

Work will start from **Sunday 1 June** and be completed by **Friday 15 August 2025**.

#### Road Safety Program

The Road Safety Program aims to improve safety and reduce crashes on NSW roads. This includes the Pedestrian Protection Sub-Program, which aims to improve protection for vulnerable road users, particularly on urban footpaths, shared pathways, cycleways and road crossings.

Since 2020, the Australian and NSW governments have invested more than \$500 million into road safety projects across NSW as part of the Road Safety Program.

#### What work are we doing?

Work activities will include:

- installing new arrow lanterns on the existing traffic light poles to allow pedestrians to more safely cross the intersection while holding motorists on red arrows
- installing new traffic signal infrastructure, including traffic light cabling, within the footpath and road area.

To install the traffic light cabling, we will need to excavate sections of the footpath and road surface.

These sections will be temporarily filled in after each shift and permanently restored before the project is completed.

Further information on the project location is shown on the map overleaf.

#### When will we be working?

We will be on site for up to **18 night shifts** between **Sunday 1 June** and **Friday 15 August 2025**, weather permitting.

We will work between **Sunday** and **Thursday, 8pm and 5am**, the next day.

We will not work on Friday and Saturday nights or on the Monday 9 June public holiday.

#### What will this mean for you and how will we manage it?

Our work needs to be carried out at night to minimise disruption to traffic and reduce safety risks to our workers, pedestrians, and motorists.

It may be noisy at times, but we will do everything we can to minimise our impacts by:

- turning off equipment and vehicles when not in use
- completing noisier tasks by midnight
- installing noise blankets around our work area when carrying out noisy activities
- using quieter equipment where possible.

If you have any concerns about the work, or how it may affect you, please contact our delivery partner, Fulton Hogan via the contact details provided below to discuss further.

## Traffic changes

There will be temporary traffic changes to make sure the work zone is safe. This will include lane closures and a reduced speed limit of 40km/h.

Temporary traffic lights will also be used while we install the new arrow lanterns.

Access to the pedestrian crossing and footpath will be maintained under the guidance of traffic controllers.

Please keep to speed limits and follow the direction of traffic controllers and signs.

Transport for NSW thanks the community for their patience while we complete this important safety improvement work.
