

Mortdale Maintenance Centre – Access Road Upgrade

Rail Service Improvement Program

February 2025

Transport for NSW acknowledges the Bidjigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Rail Service Improvement Program, formerly known as More Trains, More Services, enables a safer, more equitable, and integrated transport network where people can move safely, reliably, and efficiently across NSW.

What work are we doing?

Work at Mortdale over the coming months will involve access road widening, pavement upgrades, installation of a retaining wall and rail infrastructure improvements.

Work will be conducted predominately within the maintenance centre and adjoining car park.

In February 2025, work will include the following:

- cable service relocations
- pavement upgrades within the maintenance centre
- removal and installation of fencing
- lifting in precast concrete structures
- plant and material delivery requiring some temporary parking removal in Sydney Trains and Oatley Senior Citizens Centre car park.
- minor vegetation trimming and removal.

When and where we'll be working

Work will take place inside the maintenance centre and Oatley Senior Citizens Centre car park.

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

What will this mean for you?

You may notice:

- parking impacts inside the Oatley Senior Citizens Centre car park
- traffic controllers and signage
- deliveries of equipment and materials
- noise at times from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
