

# Mortdale Maintenance Centre Access Road Upgrade

## Rail Service Improvement Program

July and August 2025

Transport for NSW acknowledges the Bidjigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Rail Service Improvement Program enables a safer, more equitable, and integrated transport network where people can move safely, reliably and efficiently across NSW.

### What work are we doing?

Work at Mortdale in July and August 2025 will include the following:

- installing service cables
- removing and installing fencing
- completing retaining wall and associated works
- installing signage and line marking
- installing gate system
- removing materials, equipment and site buildings.

Work will be conducted predominantly within the maintenance centre and adjoining car park.

### When and where we'll be working

Work will take place inside the maintenance centre and Oatley Senior Citizens Centre car park.

Standard construction hours are **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday.**

### Out of hours work and deliveries

In July and August, some work will be required to take place outside of standard construction hours from **6am to 6pm on Saturday 26 July 2025.**

In addition, some other minor work and deliveries will take place outside of standard construction hours. This work has been assessed and will be continually monitored, however is not expected to be noticeable.

### What will this mean for you?

You may notice:

- temporary parking impacts inside the Oatley Senior Citizens Centre car park
- traffic controllers and signage
- deliveries of equipment and materials
- noise at times from machinery and equipment.

### Managing our impacts

Work will not be continuous. We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
