

Traffic switch on the Newell Highway south of Edgeroi from Friday 7 March

Narrabri to Moree Heavy Duty Pavement Upgrade

March 2025

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Work is continuing on the Newell Highway Heavy Duty Pavement Upgrade project between Narrabri and Moree to improve safety and travel reliability for all motorists.

What work are we doing?

Work is continuing on a 5.7 kilometre section of the Newell Highway south of Edgeroi about 18 kilometres north of Narrabri.

We are preparing to switch traffic onto a new section of pavement as part of the construction program.

To prepare for the traffic switch, work will include relocating safety barriers, line marking, sealing and installing signage.

When and where are we working?

We'll be working from **7am to 6pm weekdays and weekends in preparation for the traffic switch.**

Work will commence on **Friday 7 March** and is expected to take around **two weeks to complete**, weather permitting. This means that work may be required on consecutive weekends.

We have included a map to show the location of the work.

What will this mean for you?

You may notice noise from machinery and equipment, traffic control, signage, and reduced speed limits in place.

Traffic changes

There will be temporary traffic changes to ensure the work zone is safe. These include:

- single lane closures while the barriers are relocated
- reduced speed limit to 40 km/h during work hours
- intermittent stopping.

Please keep to speed limits and follow the direction of traffic controllers and signs.

Motorists should continue to allow up to 15 minutes of additional travel time when travelling between Narrabri and Moree.

For the latest traffic updates, you can call **132 701**, visit **livetraffic.com** or download the **Live Traffic NSW App**.

Managing our Impacts

We aim to manage our work to minimise impacts to the community and the environment.

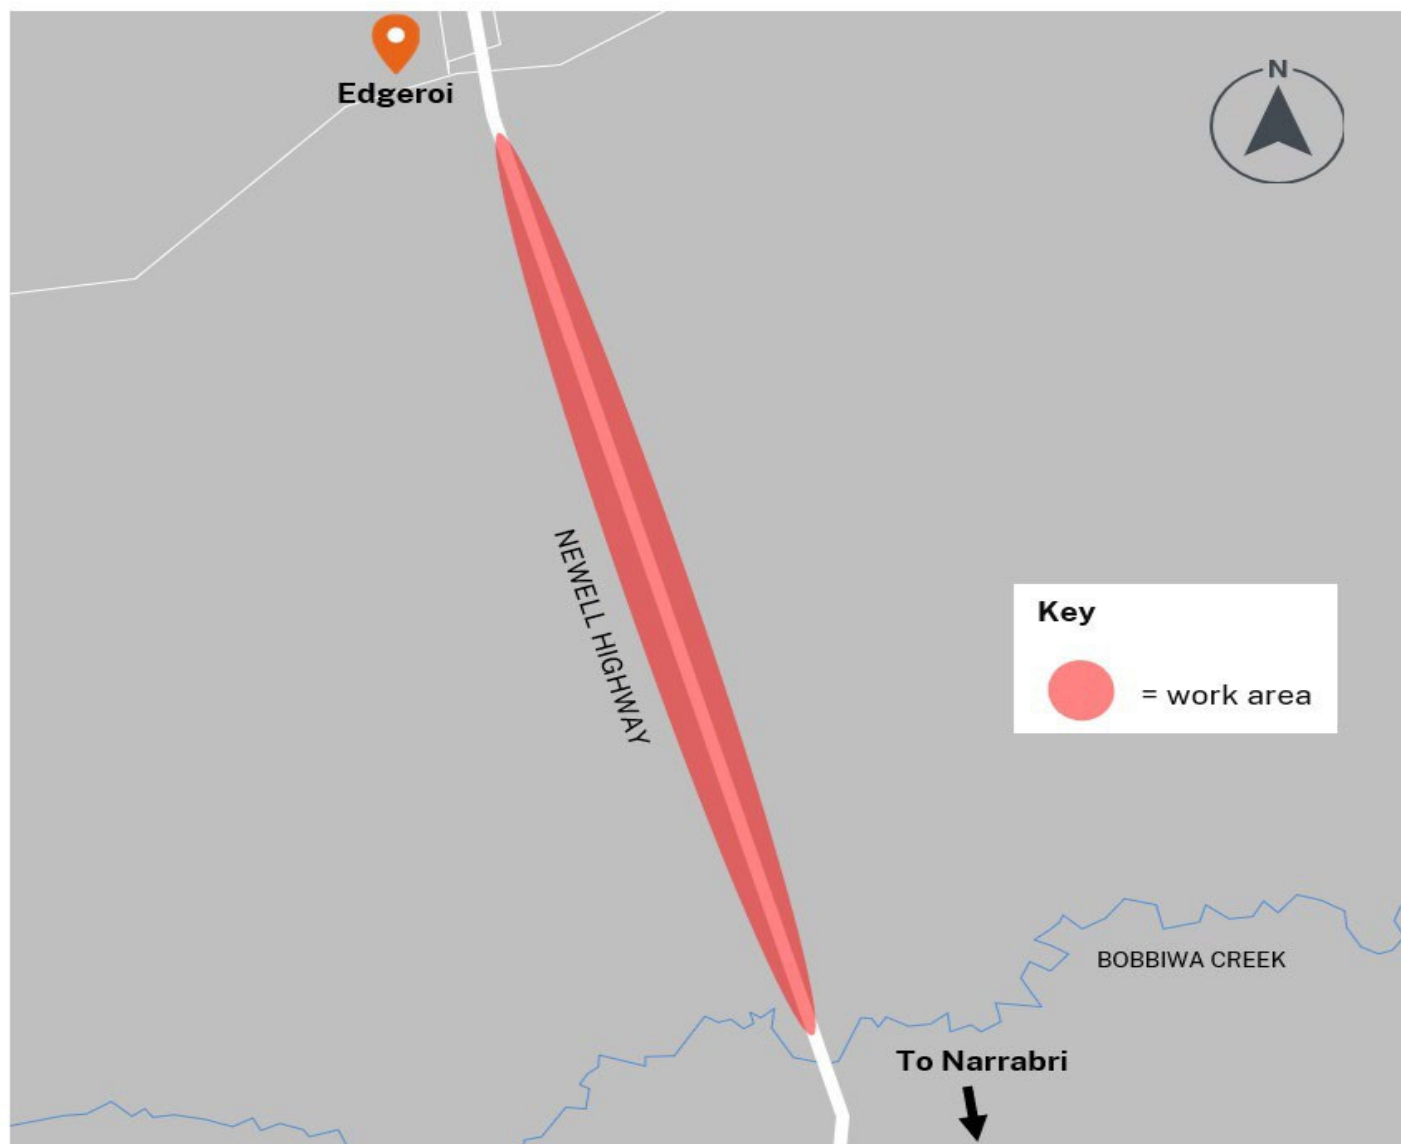

This includes:

- reducing our noise as much as possible
- turning off machinery, equipment, and vehicles when not in use
- maintaining property access at all times.

Residents and businesses within the work area will be directly consulted about the planned work activities prior to work commencing.

Location of work area
