

Thomas Street between Moulden Street and Reedsdale Road in Parkes to close permanently from 5 February

Newell Highway upgrade, Parkes Bypass

January 2025

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Construction of the Parkes Bypass is nearing completion and some key traffic changes and permanent road closures are being planned to allow for the completion of the main alignment.

What are the permanent traffic changes that will be implemented?

Transport's lead contractor Georgiou will coordinate the **permanent closure of Thomas Street between Reedsdale Road and Moulden Street** from Wednesday 5 February.

A section of Moulden Street between Condobolin Road and Back Trundle Road will also be permanently closed from 5 February, **Ross Road** will also reopen on 5 February which will provide access to Back Trundle Road while Victoria Street Bridge continues to be constructed.

We have included a map to show the location of the changes.

Other traffic changes

A section of Condobolin Road between Ross Road and Hartigan Avenue continues to be reduced to one lane under stop slow conditions while Condobolin Road is upgraded. Work is expected to take five weeks to complete.

Over Sized Over Mass movements

The Over Sized Over Mass (OSOM) route for vehicles wider than 3.5 metres will be via Condobolin Road or Hartigan Avenue. Additional OSOM vehicle access will be via Victoria Street and McGlynn Street. **Please refer to the map over the page showing the OSOM routes.**

When will we be working?

Work to implement these changes will be carried out within our standard work hours between **7am and 6pm from Monday to Friday** and **8am to 6pm on Saturdays**.

What will this mean for you?

You may notice:

- workers, traffic controllers and noise from machinery and equipment
- lane closures, intermittent stopping and reduced speed limits which may cause minor delays.

Managing our impacts

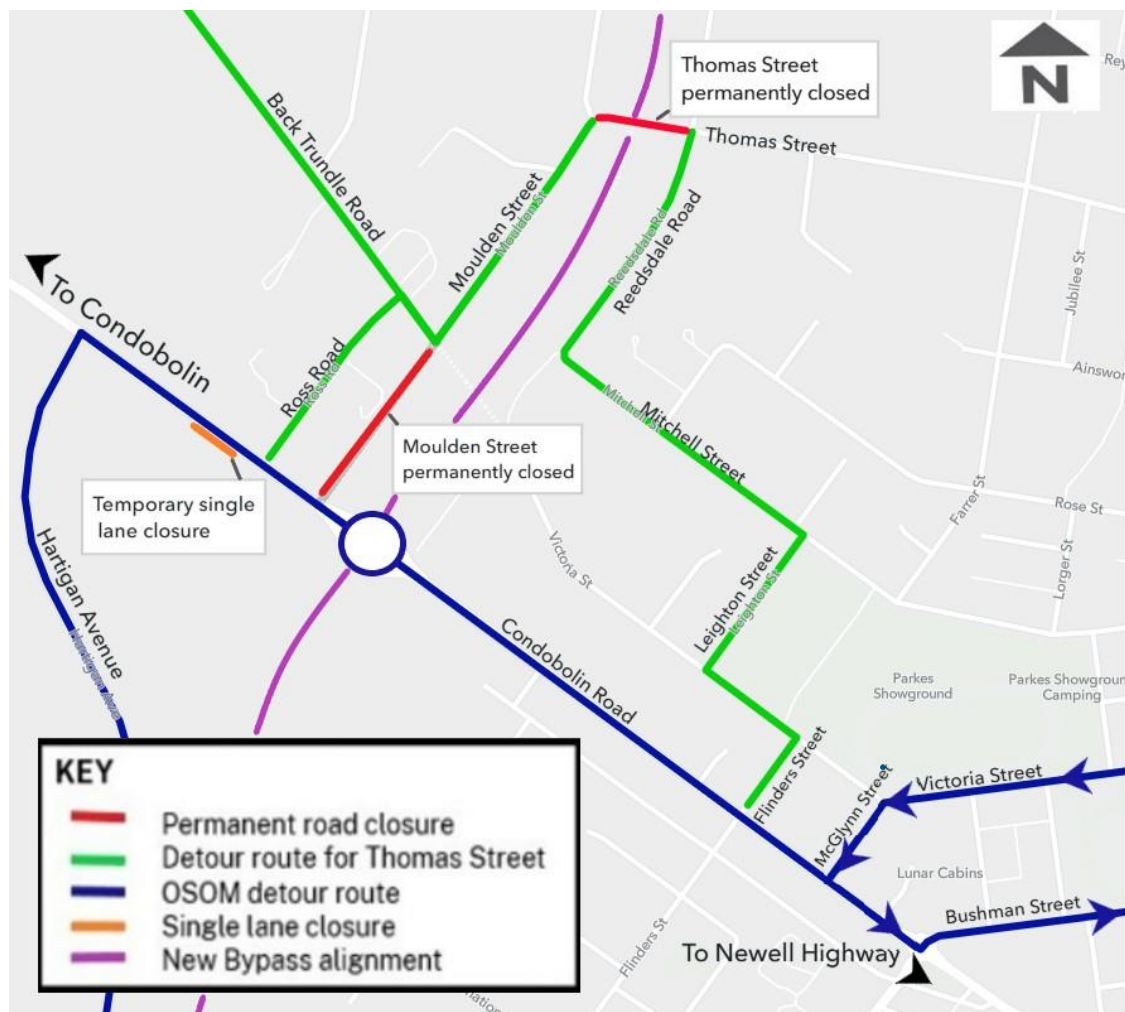

We aim to manage our work to avoid impacts to the community and the environment. This includes:

- using watercarts to suppress dust
- arranging the work in stages
- turning off machinery and vehicles when not in use
- variable messaging signs to direct traffic.

We thank you for your patience during this time.
