

# Investigation works

## Spring Farm Parkway Stage 2

February 2025

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW will carry out ground and other on-site investigation work along the proposed alignment of Spring Farm Parkway Stage 2 to help inform project planning.

### What work are we doing?

We will be drilling bore holes, excavating test pits, testing soil, utility scanning and conducting environmental surveys.

This work will be used to help inform design and construction planning for Spring Farm Parkway Stage 2.

### When will we be working?

Work will be carried out over a four month period, commencing mid February 2025. No more than two days work will be required at any single location.

This work will take place between **7am and 6pm Monday to Friday and 8am to 1pm on Saturday**. No work will occur on Sunday or public holidays.

### What will this mean?

There will be no changes to traffic or property access, unless previously agreed, but you may notice the below:

- Noise from vehicles and equipment
- Some minor vegetation clearing
- Potential dust generation.

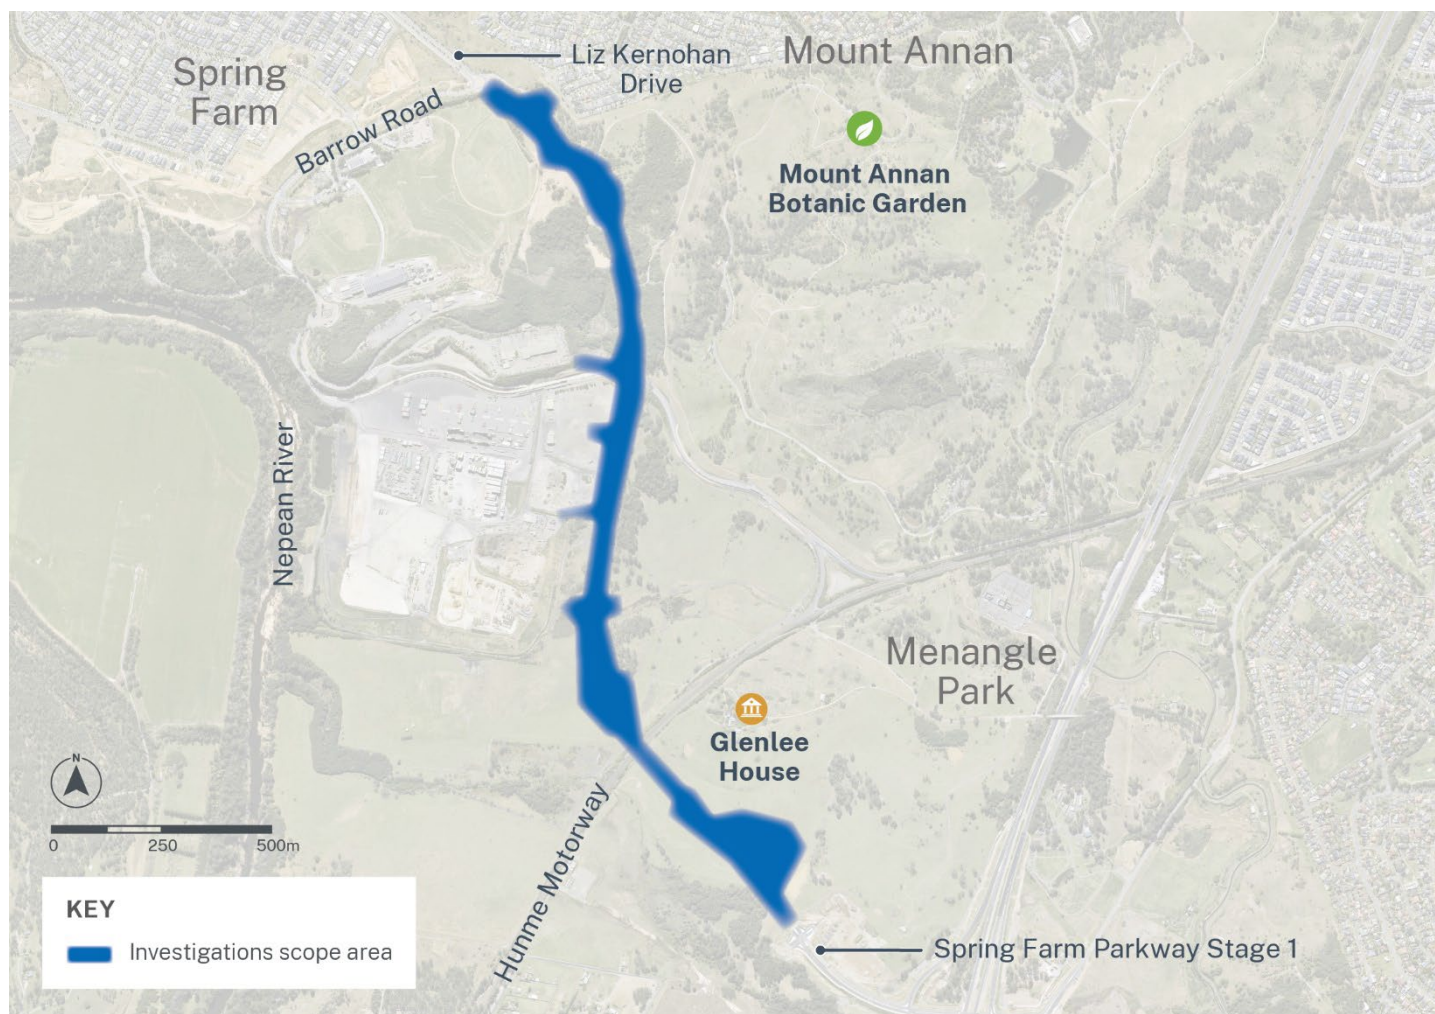

### Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- Turning off equipment and vehicles when not in use and avoiding unnecessary noise
- Using existing roads, tracks and cleared areas where possible
- Watering or covering exposed areas to minimise dust generation
- Not carrying out work during strong winds or similar high dust weather conditions
- Minimising material transportation and applying a cover when required to limit dust and odours
- Establishing no go boundaries to protect heritage and environmentally sensitive areas
- Limiting the scale of vegetation clearing
- Ensuring working areas are well maintained and all rubbish cleared
- Restoring disturbed areas i.e. filling of pits
- No release of dirty water into drainage lines and/or waterways

## Location of work area
