

Bulli town centre improvements start Monday 18 August

August 2025

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Transport for NSW will begin work in Bulli town centre to help ease congestion and create more reliable journeys through Bulli.

What work are we doing?

We are making improvements in the Bulli town centre to help traffic flow better and make the area safer for everyone.

Work includes:

- installing new traffic lights and underground cables so drivers can safely turn right from the Princes Highway onto Park Road
- adding new line marking and signs to stop right turns into Station Street
- building a new pedestrian crossing and shared path on Railway Street
- installing a new pedestrian crossing on Park Road.

In the coming months, we'll also be adding more car parking and new street lighting on Station Street.

Once all work is complete, extended clearway hours will be introduced to help ease congestion during busy times. We'll make sure to let the community know before these changes take place.

A more detailed overview of the improvements can be found on the back of this notification.

When we'll be working

We'll be working from **Monday 18 August for six weeks**, weather permitting.

From Monday 18 to Thursday 21 August, work will be carried out at night between 7pm and 4am.

From Monday 25 August for five weeks, work will be carried out between 7am and 5pm, Monday to Friday.

Speed zone change

From Tuesday 19 August, a permanent 30 km/h speed limit will be introduced on Park Road, Station, Railway and Bank streets, and Veigals Lane.

Road access changes

Upon completion of this first stage of work, vehicles will only be allowed to turn left into and left out of Station Street. Right turns will no longer be permitted.

What will this mean for you?

There will be temporary impacts to road users and surrounding residents while we carry out this work.

You may notice:

- workers and vehicles
- traffic controllers and signage
- noise, light and vibration from machinery and equipment
- parking around work areas will be temporarily unavailable during work.

We will make every effort to minimise our impacts and complete this work as quickly as possible.

Traffic impacts during work

During work, single lane closures and a reduced speed of 40 km/h will be in place for the safety of workers and road users.

Road users are advised to drive to the conditions and follow the direction of signs and traffic control.
