

Planned work in November 2025

Central Coast Highway and Tumbi Road intersection upgrade

November 2025

Transport for NSW acknowledges the Darkinjung people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Australian and NSW governments are investing \$65.5 million to upgrade the Central Coast Highway and Tumbi Road intersection.

As part of the plans to improve traffic flow and safety on the Central Coast Highway between Wamberal and Bateau Bay, the NSW Government has prioritised the most congested intersection at the Central Coast Highway and Tumbi Road.

We will be continuing work on the upgrade during November.

What work are we doing?

Work includes:

- excavation and earthwork
- building new pavements
- services investigation and installation of new services
- relocation and installation of temporary barriers

When and where we'll be working

This update covers work taking place from **Saturday 1 November to Sunday 30 November, 2025**, weather permitting.

Normal working hours are between **7am** and **6pm weekdays** and **8am** and **1pm Saturdays**.

Due to high traffic volumes during the day, we will be carrying out work at night to minimise disruption to road users and ensure the safety of workers.

Out of hours work will happen at **night** between **7pm** and **7am** from **Sunday** to **Thursday**.

What will this mean for you?

You may notice:

- workers and vehicles
- lane closures and traffic control
- noise from machinery and equipment.

A temporary reduced speed limit of 40 km/h will be in place throughout the work zone for the safety of motorists and workers.

Please keep to speed limits and follow the direction of traffic controllers and signs.

Managing our impacts

The night work will involve the use of machinery which generates noise.

We will make every effort to minimise noise by turning off machinery and vehicles when not in use.

Directly affected residents will be contacted and advised of the likely impact and what we are doing to minimise disruption during the work.

To subscribe to the email distribution list for this project, please contact tumbi@daracon.com.au

Our night work schedule (weather permitting)

Activity and location	Duration	Equipment to be used
Ausgrid overhead streetlight works	3 nights	Traffic control, trucks, lighting towers, bucket trucks/elevated work platforms, light vehicles
