

Proposed intersection improvements on Forest, Bonds and Boundary Roads, Peakhurst

Urban Roads Congestion Program

May 2025

Transport for NSW acknowledges the people of the Tharawal Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government is funding this project as part of the Urban Roads Congestion Program to improve efficiency and safety for road users.

The intersection of Forest Road, Bonds Road and Boundary Road at Peakhurst has been identified as a point of congestion in the Sydney Road Network.

Transport for NSW has identified opportunities to improve intersection efficiency, safety and reduce the likelihood of the right turning vehicles impeding the movement of the through traffic.

Work on this project is expected to start by the end of June 2025.

What are the key features?

- New dedicated right turn lanes on Boundary Road and Bonds Road approaching Forest Road
- Upgrading left turn on Forest Road into Bonds Road to improve visibility
- Relocating Bus Stop ID 2210234 on Bonds Road by 55 metres to improve visibility
- Removing 2 parking spaces on Boundary Road to allow sufficient lane length for traffic merging into one lane

- Adjusting utilities, street lighting, drainage, signage and road marking
- Adjusting driveways and footpaths

What are the benefits?

- Travel time savings for motorists and public transport using the intersection, particularly during peak periods
- Reduced queue lengths and traffic delays due to a better flow of traffic through the new dedicated right turn bay on Bonds and Boundary roads
- Improved safety at the intersection, including safer crossings for pedestrians

Managing our impacts

During the construction period, we aim to manage our work to avoid impacts to the community and the environment.

This includes:

- Fencing for safety and security
- Reducing our noise as much as possible
- Targeted lighting to minimise light spill
- Protecting trees in the work zone with no-go areas.
