

Harris Creek westbound road bridge opening 7 September 2025

Heathcote Road Upgrade

September 2025

Transport for NSW acknowledges the Cabrogal people of the Darug Nation as the Traditional Custodians of the lands and waterways on which we work and pays respect to Elders past and present.

The newly constructed westbound bridge over Harris Creek will soon open to traffic. This is the final of five new bridges built as part of the Heathcote Road Upgrade, and one of the last major milestones as we near the end of the project.

Transitioning road users to the new bridge

From 5am on Monday 8 September 2025, weather permitting, road users will be directed onto the new westbound Harris Creek Bridge during a traffic switch between Infantry Parade and MacArthur Drive.

Night work to prepare for traffic change

To carry out this work safely and efficiently, we will complete one night shift on Sunday 7 September 2025 from 8pm to 5am, weather permitting

Partial lane closures and traffic control will be in place to ensure the safety of our workers and the community.

What the new westbound bridge means for you

The new bridge is designed to withstand a 1-in-100-year flood event, improving flood resilience

and safety for the local community and all road users.

Once complete, the Heathcote Road Upgrade will provide more reliable and efficient access between southern Sydney and the Liverpool area.

Final configuration

All lanes between MacArthur Drive and The Avenue are now open to traffic. This is a key milestone for the Heathcote Road Upgrade and will help improve traffic flow through the area.

Managing our impacts

We're committed to minimising our impact on the community and the environment while we work. The upcoming night work may involve the use of machinery such as:

- generators and lighting towers
- street sweepers
- powered hand tools
- line marking equipment.

We'll manage these activities to reduce disruption by:

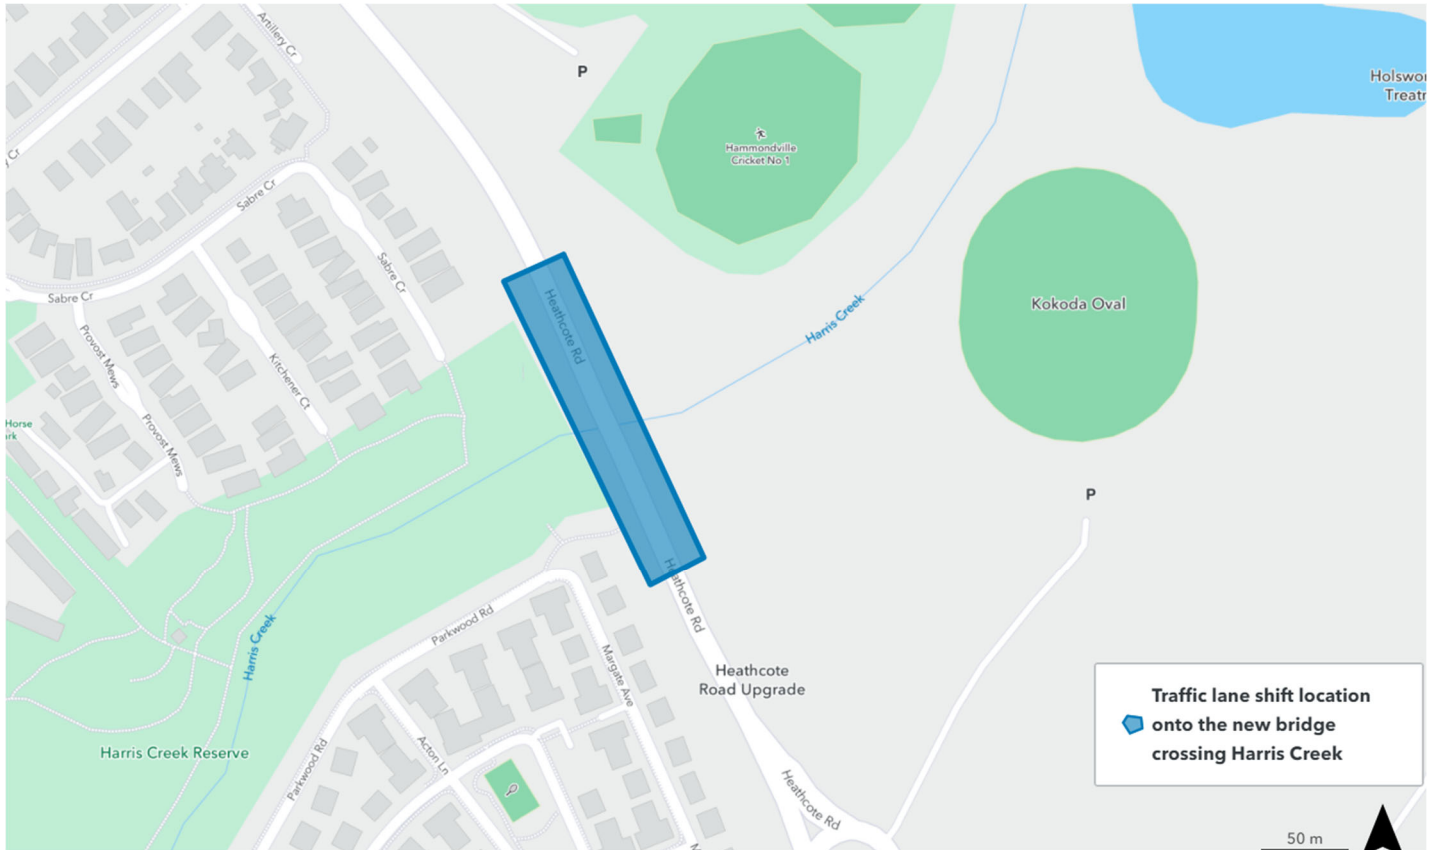

- keeping noise to a minimum and switching off machinery when not in use
- directing lighting away from nearby properties
- separating pedestrian and vehicle access
- escorting pedestrians safely through the work zone if needed
- maintaining safe access for vehicles around work areas

- protecting local vegetation, wildlife and waterways through erosion and sediment controls
- continuing to keep the community informed and listening to feedback.

Thank you for your patience as we deliver this important upgrade for our community.
