Dear [REDACTED],

**RE: ER Approval of Minor Amendments M12 Motorway Central – Contractor  
Construction Air Quality Management Sub-plan Revision H**

Thank you for providing the following documents for Environmental Representative (ER) approval of minor amendments as required by the Overarching Construction Environmental Management Plan (Overarching CEMP) and Overarching Construction Monitoring Programs as approved under the M12 Motorway approval (SSI 9364):

- M12 Motorway Central – Appendix B7 Construction Air Quality Management Sub-plan Revision H July 2025 (signed 10/07/25)

I have reviewed the minor amendments made to the document by Seymour Whyte.

This revision acknowledges the completion of dust generating construction activities. Landscaping is largely complete, and the site is substantially stabilised with negligible dust-generating activities occurring or scheduled to occur for the remainder of the project. As construction activities with the potential to generate dust are complete, air quality monitoring will be limited to monitoring in the event of a complaint where the source can be attributed to project activities, and visual surveillance to confirm no dust generation is occurring as a result of remaining project activities.

As an approved ER for the M12 Motorway project, I am satisfied the minor amendments are consistent with requirements of the approved Overarching CEMP, Overarching Sub-plans and Overarching Construction Monitoring Programs. Therefore, I approve the minor amendments to the subject Contractor Construction Air Quality Management Sub-plan.

Yours sincerely

[REDACTED]  
Environmental Representative – M12 Motorway
