

# Utility work on the Great Western Highway and Bellevue Crescent from Monday 17 February

Medlow Bath Upgrade  
February 2025

Transport for NSW pays respect to the Darug and Gundungurra people as the Traditional Custodians of the lands on which we work and pays respects to Elders past and present.

The Medlow Bath Upgrade will reduce congestion and improve safety and accessibility for all road users, commuters, and pedestrians.

## What work are we doing?

As part of the upgrade, Transport for NSW and its contractors will take advantage of a planned Endeavour Energy power outage to carry out utility work at the intersections of the Bellevue Crescent with the Great Western Highway and Delmonte Avenue.

We will be:

- relocating an existing power pole
- installing a new pole
- redirecting power cables.

## When and where we'll be working

Endeavour Energy's planned power outage will take place on **Sunday 16 February until Saturday 22 February 2025**.

We will be working from **7am to 6pm, Monday to Friday** and **Saturday from 8am to 4pm**, weather permitting.

Generators will run 24 hours a day to ensure power is supplied to residents during the outage. They will be located on the temporary access road near Bellevue Crescent, on Delmonte Avenue and Foy Avenue. Generators will be delivered in the week commencing **3 February** and will be removed after the work.

We have included a map over the page to show the location of work activities and generators.

## What will this mean for you?

Generators are being provided to ensure power supply to residents, however there will be a period when the power is cut over and supply will be interrupted for a short period of a few hours or less.

Residents directly impacted by the planned power outage will be notified by Endeavour Energy or their service provider.

## How do Endeavour Energy manage planned outages?

Under the National Electricity Customer Framework (NECF), Endeavour Energy is required to provide customers with a minimum of four business days' prior notice of planned power outages to enable them to make alternative arrangements, if necessary.

If you are impacted by a power outage you should be advised of the date and time of the power outage via Endeavour Energy's standard outage notification process.

## Managing our impacts

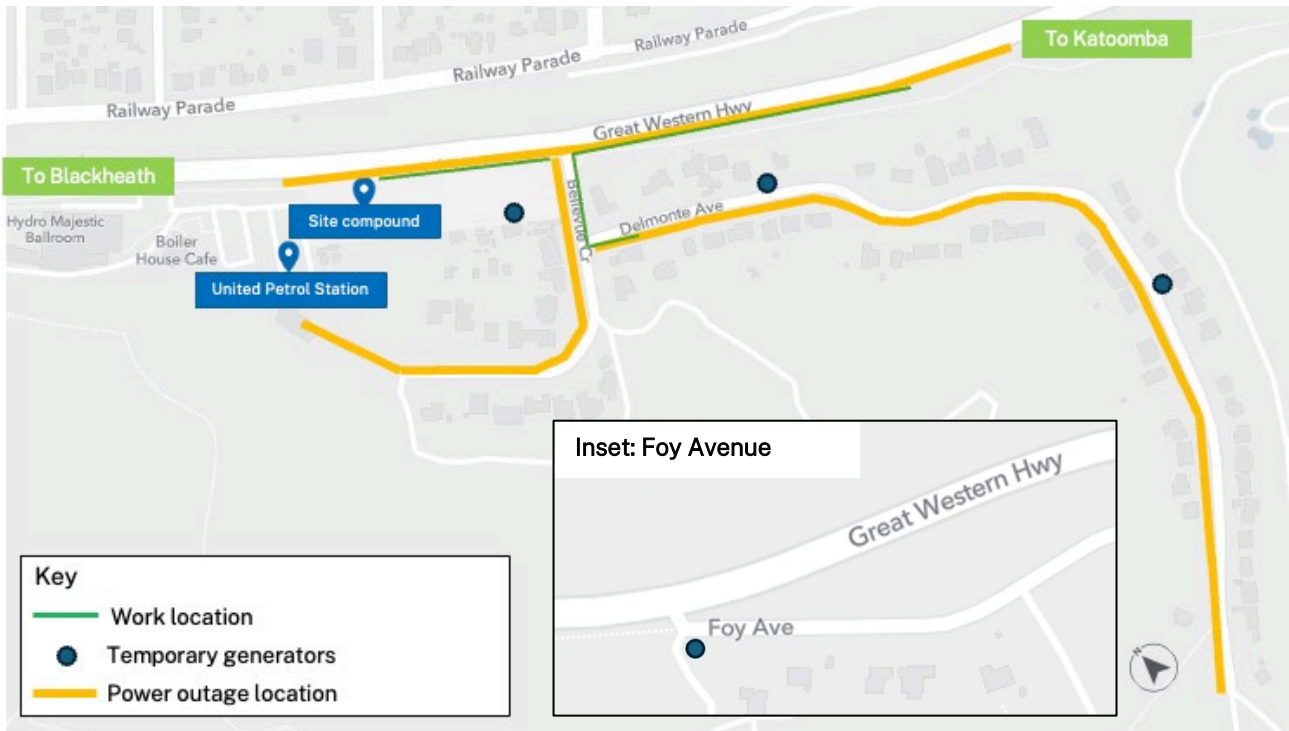

We aim to manage our work to avoid impacts to the community, residents and the environment.

This includes:

- installing noise blankets around generators
- maintaining access to properties at all times
- maintaining pedestrian access
- turning off construction machinery and vehicles not in use and arranging work in stages
- notifying directly affected residents.

## Location of planned work, generators and power outages

## Traffic impacts

Traffic control will be in place including stop/slow operations and a reduced speed limit of 40 km/h or lower in some areas.

Road users and pedestrians are advised to follow the directions of signs and traffic control.

For traffic updates, call 132 701, download the Live Traffic NSW App or visit [livetraffic.com](http://livetraffic.com).

We understand that this work may be inconvenient, and we thank you for your patience.
