

Mona Vale Road West Upgrade

Site investigations

September 2025

Transport for NSW acknowledges the Northern Beaches as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government is upgrading Mona Vale Road between Terry Hills and Ingleside, from two lanes to four lanes to ease congestion, reduce travel time and improve safety.

Project status

In 2023 the project was deferred following a state infrastructure review. In March 2025, the Australian and NSW Governments committed a combined funding of \$500 million to deliver the project.

Detailed design is underway, and we have been looking at opportunities to refine the project to better meet community needs.

Further investigations, surveys and targeted engagement with key stakeholders is being carried out to inform design refinements and ongoing project planning. We look forward to engaging with the broader community next year and are still on track to start construction in 2028.

Upcoming site investigations

From **late September** until **late February 2026**, weather permitting, we will be carrying out geotechnical and biodiversity investigations from McCarrs Creek Road to Powderworks Road.

Geotechnical investigations include:

- Establishing temporary work sites
- Using machinery to cut into the road
- Potholing or digging small trenches in the ground to locate existing underground services

- Drilling boreholes to assess underground conditions
- Assessing the condition of pavement
- Restoring the work area when our investigations are finished.

Please see map for location of geotechnical investigations.

Biodiversity investigations include:

Surveying in the project area from around McCarrs Creek Road to Powderworks Road to observe, identify and count plants, animals and other organisms. These investigations will be visual only and won't involve any digging.

When and where we'll be working

Where possible work will occur during standard construction hours between **7am and 6pm, Monday to Friday**.

Work also will occur at night from **6pm to 7am** to minimise impacts to traffic and/or for the safety of workers and community. Where possible, noisy work near residents will stop by midnight.

What will this mean for you?

During this work you may notice:

- Increased presence of workers and vehicles
- Traffic controllers and signage
- Temporary lane closures and reduced speeds
- Noise from machinery and equipment such as vehicles, trucks, drilling equipment, pavement equipment, concrete saws, generators, power tools, hand tools and vacuum trucks.

Managing our impacts

We aim to manage our work to minimise impact to the community and the environment. This includes:

- Completing work during standard construction hours where possible
- Installing noise blankets around work sites where required
- Directing lighting towers away from properties, where possible, when working at night

- Turning off machinery and vehicles when not in use.

There will be some temporary traffic changes during this work, including lane closures which may affect travel times. Please keep to the speed limits and follow the directions of traffic control and signs.

We appreciate your patience as we complete this important work.
