

# Mount Ousley interchange

## Upcoming day and night work

July 2025

Transport for NSW acknowledges the Dharawal and Wodi Wodi people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Australian and NSW governments are investing in a new interchange on the M1 Princes Motorway at the base of Mount Ousley to improve connectivity, safety and efficiency for those travelling through the gateway to Wollongong.

### What work are we doing?

Work on site will continue in July. Work activities will include:

- extensive excavation of material and ground stabilisation work on Mount Ousley Road and Dumfries Avenue
- increased truck movements transporting soil and material between work sites on both sides of the M1 Princes Motorway via University Avenue
- construction activities for the noise wall on Dumfries Avenue
- work on the pedestrian bridge over the M1 Princes Motorway at Northfields Avenue
- moving temporary barriers to delineate work areas and manage traffic
- concrete pouring
- drainage work, relocating and installing utilities
- pavement work and line marking
- delivery of oversized equipment.

For work locations, please refer to the table and map included in this notification.

### When we'll be working

Standard work hours for the project are Monday to Friday between 7am and 6pm, and Saturday between 8am and 1pm.

While building Mount Ousley interchange, we will need to work at night when working near live traffic to minimise traffic disruptions and ensure the safety of workers and road users.

### Night work and road closures

In July, night work will be carried out at times between 7pm and 6am, Mondays to Thursdays, from **Tuesday 1 July to Thursday 31 July 2025**, weather permitting. We will not work more than two consecutive nights in the same area.

In **July**, there will also be a single full night closure of the M1 Princes Motorway (Mount Ousley Road) and Picton Road between 8pm and 4am. The community will be notified in advance of the planned date for this full road closure.

More detailed information will be provided to nearby residents in advance of any night work that is expected to be noisy.

### How will night work affect you?

There will be some noise and lighting associated with night work. We will make every effort to minimise these impacts by:

- not working more than two consecutive nights in the same area
- using non-tonal reversing beepers on equipment
- turning machinery off when not in use

- carrying out noisier work early during night shift where possible
- turning off lights when not required.

Equipment being used during work will include light vehicles and trucks, vacuum trucks, lighting towers, generators, excavators with hammers and chainsaws, rollers and graders, piling rigs, compaction equipment, road profiler and saw, asphalt paver and spray seal truck, concreting equipment, line marking truck, chainsaws and mulchers, and cranes.

## Traffic impacts

During work, traffic control, changed traffic conditions, lane and road closures, and reduced speed limits will be in place.

Road users are advised to drive to the conditions and follow detours and the directions of signs and traffic control.

Electronic message signs and Live Traffic will advertise traffic impacts in advance and any changes to dates due to weather impacts.

The table over the page provides a summary of work activities and traffic changes that will occur between **Tuesday 1 July** and **Thursday 31 July 2025**. When dates for significant traffic impacts are confirmed, they will be advertised on electronic message signs and Live Traffic.
