

# Planned out of hours work

## Newcastle Inner City Bypass – Rankin Park to Jesmond

November 2024

Transport for NSW acknowledges the Awabakal people of the Awabakal Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

### The Australian and NSW governments are investing in the Rankin Park to Jesmond section of the Newcastle Inner City Bypass.

Work is continuing on the 3.4 kilometre section of the bypass. Transport for NSW has engaged Fulton Hogan to finalise the design and construct this section of the bypass.

#### What work are we doing?

We will be carrying out general road and bridge construction including concrete pouring of structural elements and piling. Our work at Jesmond also includes continued drainage work to install a new culvert and pipe network, utilities relocations including electrical works and permanent street lighting, road pavement construction and modifications to the traffic control systems to adjust traffic flow. We will also be carrying out major traffic switches at the northern interchange at Jesmond.

#### When and where we'll be working

The work will occur along the length of the bypass from the southern interchange on Lookout Road and McCaffrey Drive at New Lambton Heights, to the northern interchange on Newcastle Road and Main Road, Jesmond. Additional works will occur in Jesmond Park and near the John Hunter Hospital.

Day work will be carried out **Monday to Friday between 7am and 6pm** and **Saturday from 8am to 5pm**. No work will be carried out on public holidays.

Work will be carried out in or next to live traffic lanes or require the night-time isolation of services, so out of hours is the safest way to conduct this work.

Night work will be carried out from **Sunday to Thursday between 6pm and 7am**.

Drainage and utilities work will continue around the Jesmond roundabout, and lanes will realign. Lookout Road drainage and utility works will continue.

Works will commence to realign Newcastle Road in both directions at Jesmond under the bridge and remove the Jesmond roundabout. We will provide additional information about details and timing of the switch as we progress.

#### What will this mean for you?

During night work there will be traffic control on site, temporary lane closures and machinery operating adjacent to or in the road lanes.

These will move locations, please take care, keep to the signposted speed limits and follow the direction of traffic controllers.

We work outside standard construction hours to:

- Improve safety by minimising the interactions between road users, pedestrians and workers
- Minimise delays and journey times for motorists and businesses.

#### Managing our impacts

There will be machinery and other plant and equipment working in different areas throughout the night work. The machinery and equipment generate light, noise, and vibration. We will make every effort to minimise these impacts by:

- Turning off machinery and vehicles when not in use
- Using non-tonal reversing alarms
- Positioning of machines and directing temporary lighting down and away from homes
- Planning activities close to residents within standard construction hours and scheduling noisy activities earlier in the night, where possible
- Monitoring noise to manage any potential impacts and adjusting our work, where possible.

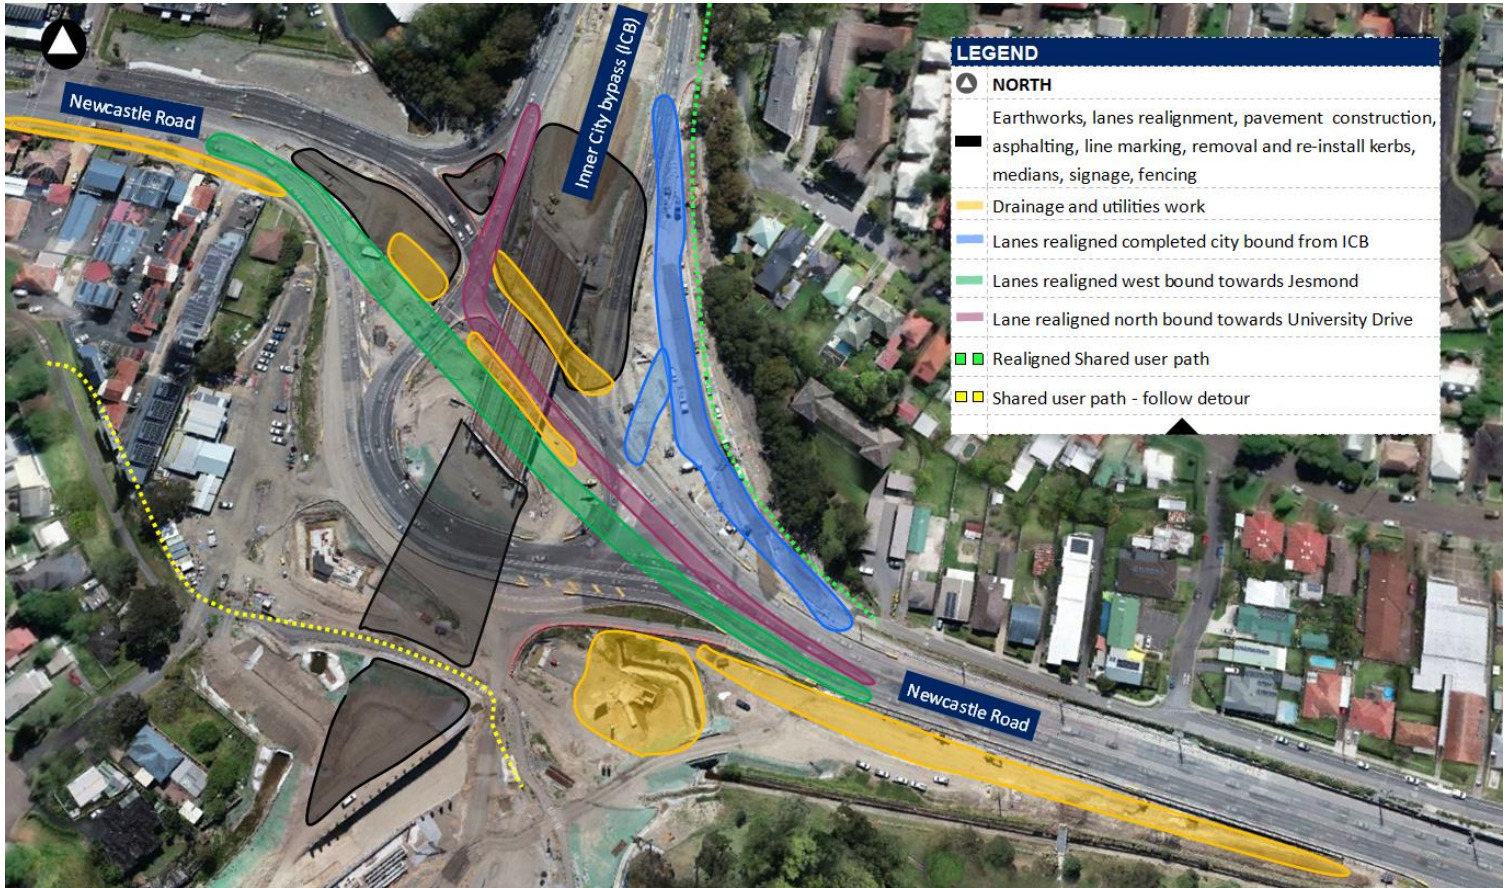

Noise levels will be moderate. Directly affected residents will be contacted and advised of the likely impact and what we are doing to minimise disruption during the work.

## Details of planned out of hours work at Jesmond – Friday 15 November to Sunday 15 December

Out of hours work activities	Equipment
<ul style="list-style-type: none"> <li>• Realigning of lanes on Newcastle Road at the Jesmond roundabout, removal and installation of line marking, safety barriers</li> <li>• Installation of road pavement, kerbs, gutters, medians, and footpaths, retaining walls, road signage, street furniture</li> <li>• Asphalt works, including milling and paving works</li> <li>• Installation of bridge components and removal of temporary works, concrete pours, and formwork</li> <li>• Removal of existing and installing new concrete drainage, stormwater pits, stormwater pipes and box culverts, connection to stormwater lines</li> <li>• Geotechnical investigations, surveying work</li> <li>• Vegetation maintenance</li> <li>• Relocation of existing and installation of new utility assets, including traffic control signals, electrical (power) lines (overhead &amp; underground), water and street lighting</li> <li>• Service investigation using non-destructive digging</li> <li>• Delivery and installation of precast structures</li> <li>• Trucks moving equipment between locations including deliveries of plant and materials</li> <li>• Lane closures near project area, traffic control set up and pack up</li> <li>• Installation of temporary work and support structures to facilitate and protect new installations or excavations.</li> </ul>	<ul style="list-style-type: none"> <li>• Asphalt paver, shuttle buggy, road mill, rollers</li> <li>• Street sweepers, excavators, hammers, tippers, rollers, compactors, graders, dozers, bobcats, posi-tracks, watercarts, dump trucks</li> <li>• Kerb machine, concrete trucks</li> <li>• Trucks for line marking and removal, barrier install and removal</li> <li>• Hand-held compactors, carpentry tools and concrete tools</li> <li>• Trucks and light vehicles</li> <li>• Lighting towers and generators</li> <li>• Shoring during excavations including sheet piling, shoring boxes, and steel plates</li> <li>• Concrete road saws and road profilers</li> <li>• Pumps and dewatering equipment</li> <li>• Elevated work platforms, cranes, and borers</li> <li>• Vacuum trucks</li> <li>• Trucks such as rigids, watercarts and sweepers</li> <li>• Mobile cranes including frannas</li> <li>• Concrete pumps, concrete trucks, and concreting tools</li> <li>• Cranes being delivered, installed, and dismantled</li> <li>• Oversized vehicles for deliveries</li> <li>• Delivery of precast elements - jinker (girder)</li> </ul>

This is an artist impression only and is not to scale.

Details of planned out of hours work at New Lambton Heights – Friday 15 November to Sunday 15 December

Out of hours work activities
<ul style="list-style-type: none"><li>• Concrete pours and bridgeworks</li><li>• Trucks moving equipment between locations including deliveries of plant and materials</li><li>• Delivery and installation of bridge &amp; culvert precast structures</li><li>• Realigning and installation of road pavement, kerbs, medians, and footpaths, retaining walls, road signage, street furniture etc</li><li>• Drainage works including removing existing and installing new stormwater pits, stormwater pipes and box culverts, connection to services</li><li>• Removing concrete kerbs, medians, islands, structural signage, and pavements</li><li>• Installation of road pavement, kerbs, medians, road signage, street furniture, service investigation using non-destructive digging, barrier placement including relocation and mechanical anchoring</li><li>• Street cleaning and dust suppression, when required.</li><li>• Relocation of existing and installation of new utility assets, including traffic control signals, electrical (power) lines (overhead &amp; underground), water, communication lines and street lighting.</li></ul>
Equipment
<ul style="list-style-type: none"><li>• Mobile cranes including frannas, concrete pumps, concrete trucks, water pumps and drill rig</li><li>• Elevated work platforms, kerb machines, crane borers and concrete deliveries</li><li>• Cranes delivered, installed, used and dismantled, oversized vehicles for deliveries</li><li>• Traffic control systems modifications including set up and pack up</li><li>• Tracked and wheeled excavators</li><li>• Jackhammer, hammer drill, concrete saw</li><li>• Trucks, including rigids, watercarts, sweeper</li><li>• Mobile cranes including frannas</li><li>• Vacuum truck for non-destructive digging</li><li>• Backhoe, bobcat, skid-steer loader, roller</li><li>• Seal and aggregate trucks, rollers</li><li>• Compaction equipment and concrete vibrators, lighting towers and pumps</li><li>• Asphalt paver, profiler, and support vehicles</li><li>• CCTV, survey and light vehicles, pole borer lifter and borer machine Trenchless underground boring (horizontal directional drilling rig).</li></ul>
