

Jeremadra Creek to Bimbimbie Road – road safety improvements

Princes Highway Corridor safety and efficiency upgrades program

Community notification

June 2025

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Transport for NSW is delivering road safety improvements on the Princes Highway between Jeremadra Creek and Bimbimbie Road under the Corridor safety and efficiency upgrades program.

The Corridor safety and efficiency upgrades program will deliver targeted upgrades on the Princes Highway between Sussex Inlet Road and Moruya to improve safety on this section of the Highway.

What work are we doing?

The safety improvements will include:

- installing a new one-metre-wide centreline to connect to the existing wide centreline
- installing new flexible roadside safety barriers and upgrading existing barriers
- widening the road pavement to allow for an increased shoulder width and to accommodate the widened centreline
- installing new drainage and concrete kerb and guttering.

What are the benefits of the safety improvements?

Wide centreline

Replaces the existing centreline with two new centrelines spaced one metre apart to increase the space between vehicles travelling in opposite directions, reducing the risk of head-on crashes.

Flexible safety barrier

Helps redirect drivers back into their lane to prevent off road crashes, reducing the risk of serious injury or death.

Shoulder widening

Road shoulders provide an area for broken down vehicles to stop and recover, as well as offering space for motorists to avoid hazards on the road.

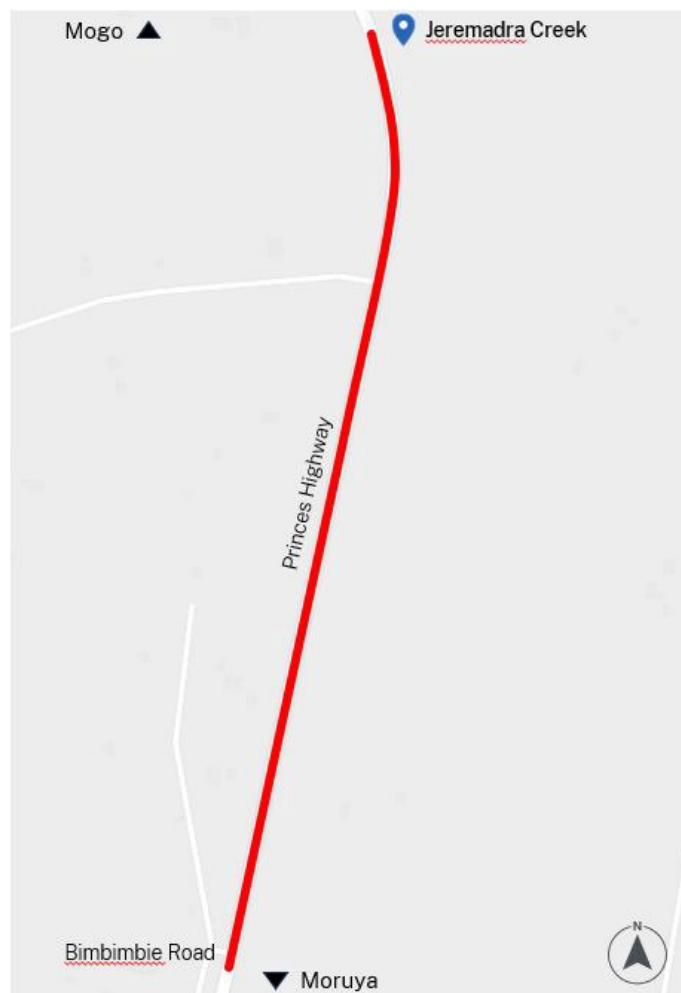

When and where we'll be working

We will be working on the Princes Highway between Jeremadra Creek and Bimbimbie Road from **Monday 16 June to Friday 1 August 2025**, weather permitting.

Work will be carried out Monday to Friday between 6am and 6pm.

Location of work area

What will this mean for you?

During work hours, you may notice:

- workers and vehicles in the area
- traffic controllers and signage
- lane closures and reduced speed limits
- noise from machinery and equipment.

Single lane closures, a reduced speed limit of 40 km/h and stop/slow traffic control will be in place while work is under way to ensure the safety of road users and workers.

Motorists are advised to allow up to five minutes' additional travel time, drive to the conditions and follow the directions of signs and traffic control.

Managing our impacts

We aim to manage our work to minimise impacts to traffic, the community and the environment.

This includes:

- reducing our noise as much as we can
- completing the work as quickly as possible.

We thank you for your patience while we carry out this necessary work.
