

The Rail Service Improvement Program

Arncliffe to Tempe Signalling Upgrade

July 2025

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Rail Service Improvement Program enables a safer, more equitable, and integrated transport network where people can travel more safely, reliably, and efficiently across NSW.

In July, we will be working within the rail corridor between Arncliffe and Tempe Stations.

These works are all scheduled to take place during standard construction hours only.

What work are we doing?

Work includes:

- Wiring and installation of cables
- Completing design verification and testing activities.

When and where we'll be working

Work will take place within the rail corridor between Arncliffe and Tempe Stations. We will also be working at
