

Transport Access Program

Banksia Station Upgrade

Project Update

December 2019

The Transport Access program is a Transport for NSW initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure.

Planning is currently underway to improve accessibility at Banksia Station.

The upgrade at Banksia Station is being delivered as part of the Transport Access Program, a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure across the state.

As part of the program, the Banksia Station Upgrade would aim to provide a station precinct that is accessible to people with a disability, limited mobility, parents and carers with prams and customers with luggage.

Early investigation work

As part of the planning process, preliminary investigations will be undertaken to help identify what upgrades will be required to make Banksia Station fully accessible.

Early investigation work will be undertaken at the station from **8am Saturday 7 December until 4pm Sunday 8 December 2019**.

This work will include:

- taking soil samples
- locating underground services
- investigations of existing electrical and signalling services

Equipment to be used will include survey tools, geo-technical drilling rigs, and small construction trucks.

Where possible, measures will be implemented to reduce noise associated with this work, including turning off vehicles and equipment when not in use and using non-tonal reversing beepers.

For further information please call the Project Infoline on **1800 684 490** or email
