

Power Supply Upgrade

Sutherland Substation

COMMUNITY NOTIFICATION

June 2021

We are making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder project.

Project overview

The DC Feeder project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Sutherland.

Weekend work – Saturday 26 and Sunday 27 June

Between 6.30am and 5.30pm on Saturday 26 and Sunday 27 June, we will be working inside the rail corridor at Sutherland Substation to upgrade power supply cables. Work will involve the removal of existing cables and the installation of new cables. Workers will access the rail corridor through the gate on the Old Princes Highway, Sutherland.

What you may notice

Equipment used during the work activity will include a vacuum truck, work vehicles, and various handheld power tools including drills and grinders. You may notice noise from the use of the vacuum truck that is required as part of the works. Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment within the rail corridor and monitor our work activities to make sure noise levels are being managed effectively.
