

Power Supply Upgrade

Granville Substation

COMMUNITY NOTIFICATION

August 2021

We are making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder project.

Project overview

The DC Feeder project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Granville.

Weekday work – Thursday 26 and Friday 27 August

On Thursday 26 and Friday 27 August between 7am and 6pm we will be preparing the work site for weekend works.

Work will include setting up site amenities, and preparing cables for installation within the rail corridor at Granville Substation. Work will also involve deliveries to the site from Mort Street and Railway Parade, Granville.

Weekend work – Saturday 28 and Sunday 29 August

From 12am Saturday 28 to 4pm Sunday 29 August we will be working continuously within the rail corridor at Granville Substation to upgrade power supply cables.

Work will involve new cable installation and welding of plates on the rail gantry and testing of new cables. Vehicles and workers will access the rail corridor through the gates on Mort Street and Railway Parade, Granville.

What you may notice

Equipment used during the work activity will include excavators, a generator, lighting, work vehicles and various handheld power tools including drills, welders and grinders. You may notice vehicles entering the site and deliveries being made to the work site from Mort Street and Railway Parade, Granville.

Transport for NSW is committed to minimising noise impacts on the community and we switch off equipment when it is not being used and monitor our work activities to make sure noise levels are being managed effectively.
