

Power Supply Upgrade

DC Feeder Upgrade Project - Toongabbie

COMMUNITY NOTIFICATION

November 2021

Transport for NSW is making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder Upgrade Project.

Project overview

The DC Feeder Upgrade Project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Toongabbie.

Weekday work – Wednesday 10 November 2021

During the day between 7am until 6pm on Wednesday 10 November 2021, work will be carried out to prepare Toongabbie Substation for upgraded electrical infrastructure. Works will involve borehole digging and geotechnical works.

These works are carried out while also complying with the current Public Health Orders and a COVID-19 Safe Plan is in place, including masks and QR codes.

What you may notice

You may notice workers and vehicles accessing the Substation from the gate on Wentworth Avenue, Toongabbie.

Equipment used during the work activity will include a vacuum truck, drill rig and handheld power tools such as drills and grinders.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

If you have a Year 11 or 12 student undertaking trial exams or studying for the HSC in your household, we would appreciate if you could let us know.
