

# Power Supply Upgrade

## DC Feeder Project - Lewisham Substation

**COMMUNITY NOTIFICATION**

**October 2021**

Transport for NSW is making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder Project.

### Project overview

The DC Feeder Project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Lewisham.

### Weekend work – Saturday 9 October to Sunday 10 October 2021

**Between 6am Saturday 9 October and 6pm Sunday 10 October 2021** we will be working inside the rail corridor at Lewisham Substation to upgrade power supply cables.

Works will be taking place overnight on Saturday 9 October and will involve removal and installation of cables including some drilling, scanning and testing of cables. Workers will access the rail corridor through the gate on Alfred Street, Lewisham.

### What you may notice

Equipment used during the work activity will include work vehicles, compressors, excavators, lighting and various handheld power tools including drills and grinders.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used and monitor our work activities to make sure noise levels are being managed effectively.

If you have a Year 11 or 12 student undertaking trial exams or studying for the HSC in your household, we would appreciate if you could let us know.

### Keeping the community informed

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your patience and understanding during these important upgrades to the rail network.
