

# Power Supply Upgrade

## DC Feeder Project - Toongabbie Substation

**COMMUNITY NOTIFICATION**

**October 2021**

Transport for NSW is making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder Project.

### **Project overview**

The DC Feeder Project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Toongabbie.

### **Weekday work – Monday 11 October to Friday 22 October 2021**

**During the weekdays between 7am Monday 11 October until 6pm Friday 22 October 2021,** work will be carried out to prepare Toongabbie Substation for upgraded electrical infrastructure. Works will involve site survey, installation of fencing, geotechnical works and borehole digging.

These works are carried out while also complying with the current Public Health Orders and a COVID-19 Safe Plan is in place, including masks and QR codes.

### **What you may notice**

You may notice workers and vehicles accessing the Substation from the gate on Wentworth Avenue, Toongabbie.

Equipment used during the work activity will include a vacuum truck, drill rig and handheld power tools such as drills and grinders.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

If you have a Year 11 or 12 student undertaking trial exams or studying for the HSC in your household, we would appreciate if you could let us know.
