

Power Supply Upgrade

Yagoona

COMMUNITY NOTIFICATION

May 2021

Project overview

Transport for NSW is undertaking power supply upgrade work which is designed to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. The work involves upgrades to substations, section huts, overhead wiring and feeders as well as the construction of new infrastructure across the network.

To support this work we are undertaking AC Feeder investigation activities within the rail corridor at Yagoona.

Upcoming activities at Yagoona

From **6am to 6pm on Saturday 29 and Sunday 30 May**, we will be working within the rail corridor in Yagoona, weather permitting. A map showing the work location is provided overleaf.

The work will involve scanning and excavation to identify underground services and utilities, before drilling to extract soil samples. Once the investigative work is completed the area will be returned to its original state.

Access to the rail corridor will be via various gates adjacent to the work areas, as shown in the map.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on **131 500** or visit **transportnsw.info** for information about replacement bus services.

What you may notice

Equipment required for this work includes drilling equipment, vacuum trucks, construction trucks and other light vehicles and handheld power tools. Higher noise generating work is only expected to occur for short periods.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
