

Power Supply Upgrade

DC Feeder Project - Ashfield Substation

COMMUNITY NOTIFICATION

January 2022

Transport for NSW is making improvements to the Sydney Trains electrical infrastructure to meet expected power requirements for future rail network and new fleet of air-conditioned trains. As part of this, we are carrying out power supply upgrade work through our DC Feeder Project.

Project overview

The DC Feeder Project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Ashfield.

Weekend work – Saturday 22 January to Sunday 23 January 2022

Between 6am Saturday 22 January 2022 and 6pm Sunday 23 January 2022 we will carry out works to prepare and install cables within Ashfield Substation. Works will involve construction of cable supports and removal, installation and testing of cables.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on **131 500** or visit **transportnsw.info** for information about replacement services.

Traffic and parking changes

You may notice workers and vehicles accessing the substation from the gates at the end of Alt Street and Nixon Avenue. Driveway and vehicle access to residential properties will be maintained at all times during the work, however you may experience minor delays entering and exiting your property depending on the stage of the works.

To allow work to be carried out safely, traffic management will be in place when works are being carried out in close proximity to Alt Street and Nixon Avenue.

Please see map overleaf for more details of the work area.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **1800 684 490**. The interpreter will then assist you with translation.

What you may notice

Equipment used during these works will include excavators, grinders, work vehicles, and various electric hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

Keeping the community informed

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your patience and understanding during these important upgrades to the rail network.
