

Power Supply Upgrade

Blacktown

Project Update - February 2022

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. The work involves upgrades to substations, section huts, overhead wiring and feeders as well as the construction of new infrastructure across the network.

Upcoming work

The AC Feeder Upgrade Project team will be upgrading and installing a new electrical pole outside 27 Richmond Road, Blacktown. See map of work area on the next page.

This work is planned to be carried out in two stages.

Stage 1 - A total of 1-2 days and nights

Before the new pole can be installed, service investigation work will be carried out and a hole will be pre-drilled, daytime work will occur between 7am and 6pm and night work will occur between 6pm and 7am, Monday 28 February to Saturday 5 March 2022. This work will involve:

- Delivering plant and materials to each work area and setting up safety fencing
- Identifying utility services using handheld device or vacuum truck
- Using an auger to pre-drill hole for new pole
- Temporary cover placed over, and temporary fencing placed around the hole to make safe until the new pole is installed during Stage 2 work.

No power outage will be required to carry out work in Stage 1.

Stage 2 – 1 night

The new pole will be delivered and installed from **6pm Wednesday 9 March 2022 to 7am Thursday 10 March 2022**. This work will involve:

- Delivering plant and materials to each work area and setting up safety fencing
- Removing the existing pole and installing new pole
- Transferring fixtures on the existing pole to the new pole and installing new services on the new pole.

A power outage will be required to carry out work in Stage 2.

For the safety of workers, **a power outage is necessary. Endeavour Energy will schedule this power outage of up to 8 hours and will separately distribute a notification specific for this power outage.** We will coordinate the work with Endeavour Energy and will ask that power be restored as soon as practicable and safe to do so. We apologise in advance for any inconvenience the outage may cause. If you experience unexpected loss of power, please contact Endeavour Energy general enquiries www.endeavourenergy.com.au or emergencies: **13 10 03**.

This work is subject to site and weather conditions. You will be notified if work is to be conducted outside of these times.

What you may notice

Due to a high volume of vehicle and pedestrian traffic during the daytime period, for the safety of workers and the public, some work needs to be carried out at night. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively. During work, temporary partial lane closures will be in place. We will have traffic controllers and signage in place to safely guide and assist motorists and pedestrians. This will be for the safety of the public and workers. We apologise for any inconvenience this work may cause.

Keeping the community informed

If you would like to speak with the project team about this work, please contact TfNSW through the details provided below. Thank you for your patience and understanding during this work.
