

# Power Supply Upgrade

## AC Feeder Upgrade Project – Revesby and Bankstown

### Project Update - March 2022

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. The work involves upgrades to substations, section huts, overhead wiring and feeders as well as the construction of new infrastructure across the network.

### Upcoming work

The AC Feeder Upgrade Project team will continue carrying out work to install new power poles and remove existing power poles at various locations along **Polo Street, Bransgrove Road, Albert Street and Milperra Road, Revesby and Mons Street, Eldridge Road and Northam Avenue, Bankstown. Work will also occur in the rail corridor between Bankstown Station and Yagoona Station.** From **Tuesday 1 March 2022 to Wednesday 30 March 2022 work will be carried out between 7am and 6pm Monday to Sunday.** This work is subject to site and weather conditions. You will be notified if work will be conducted outside of these times. See map of work areas on the next page.

This work will be carried out in three stages. At each work area, prior to commencement of each stage, delivery of plant and materials and setting up of safety barriers and traffic control will be carried out.

#### Stage 1 - 1-2 days, early to late 2022

Before the new pole can be installed, service investigation work will be carried out and suitable holes will be pre-drilled. This work will involve:

- Identifying utility services using a vacuum truck
- Using an auger to pre-drill holes for new poles
- Holes will be covered and fencing placed around them to make them safe until the new poles are installed during Stage 2 work

#### Stage 2 – 1-2 days, early to late 2022

The new power pole will be delivered and installed, this work will involve:

- Using an auger to pre-drill holes for new poles
- Installing the new power pole and fixtures
- Transferring of existing cable to new pole
- Removal, or partial removal of existing pole

#### Stage 3 – 1-2 days, mid to late 2022

New cable will be strung between the power poles, this work will involve:

- Stringing the new cable between the power poles
- Terminating and removing the existing cable
- Removing the existing power pole

**To carry out works safely, an Ausgrid power outage is necessary in Stage 2 and Stage 3. Ausgrid will schedule this power outage, which may be up to 8 hours, and will separately distribute a notification specific for this outage.**

## Map of work area

We will coordinate the work with Ausgrid and will ask to restore power as soon as practicable and safe to do so. If you experience unexpected loss of power, please contact Ausgrid general enquiries <https://www.ausgrid.com.au/Contact-Us> or emergencies: **13 13 88**.

### What you may notice

Transport for NSW is committed to minimising impact on the community. Some vegetation trimming will be carried out to facilitate this work. We monitor our work activities to make sure noise levels are being managed effectively. At each work area, street parking will be unavailable 1-2 days prior to work commencing and while work is carried out. A partial lane closure will be in place closest to the work area. Access to properties may be delayed for short periods of time, typically less than 10 minutes. For your safety, please follow the direction of traffic control. We apologise for any inconvenience this work may cause.

### Keeping the community informed

If you would like to speak with the project team about this work, please contact TfNSW through the details provided below. Thank you for your patience and understanding during this work.
