

Power Supply Upgrade

DC Feeder Upgrade Project - Toongabbie

Community Notification – April - May 2022

Transport for NSW is making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder Upgrade Project.

Project overview

The DC Feeder Upgrade Project will improve power delivery to the railway and involves the replacement of electrical cables and overhead wiring infrastructure across a number of sites in the rail network, including at Toongabbie.

Weekend work

Construction work will take place from **7am Saturday 30 April to 6pm Sunday 1 May 2022**. Please see work location map overleaf for details on the work area.

These works are in line with current Public Health Orders and a COVID-19 Safe Plan is in place for all activity in the work area, including masks and QR codes.

Work activities include cable removal and installation, cable route construction and hole digging within the rail corridor at Toongabbie Substation. Workers will access the corridor from Wentworth Avenue, Toongabbie.

The work in your area will be carried out on different occasions during this period. Every effort will be made to keep the construction noise to a minimum and reduce impacts to the community whenever possible.

Equipment will include excavators, drills, vacuum machines and welding and other handheld power tools.

Traffic management will be in place, however there is expected to be minimal impacts for vehicles and pedestrians.

What you may notice

There will be some noise associated with these weekend works. Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

Keeping the community informed

If you would like to speak with the project team about this work, please contact TfNSW through the details provided below. Thank you for your patience and understanding during these important upgrades to the rail network.
