

AC Feeder Upgrade – Sefton, Birrong, Yagoona and Bankstown

Power Supply Upgrade

August 2023

Transport for NSW acknowledges the Darug and Eora Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and the new fleet of airconditioned trains. The work involves construction of new electrical infrastructure across the network as well as the upgrades to substations, section huts, overhead wiring and feeders.

What work are we doing?

Work through August 2023 will include:

- delivering equipment and materials to and from temporary work sites
- trimming and removing vegetation
- identifying utility services using a vacuum truck
- retaining wall work
- drilling holes for new power poles and new earthing rods. Temporary covers and fencing will be placed over and around the holes for safety until the new power poles are installed.
- installing new power poles and removing some existing poles
- transferring/restringing conductors (wires)
- restoring locations when our work is finished.

Equipment to be used

Plant and equipment expected to be used include augers, cranes, elevated work platforms, service vehicles, delivery vehicles, electrical and hand tools.

When and where we'll be working

Working hours are **7am to 6pm, Monday to Friday**,

and 8am to 1pm, Saturday. Work within working hours may occur anywhere along the feeder route shown on the map on the next page. The feeder route is mostly within the rail corridor.

Out of hours work is scheduled on **26–27 August 2023** from 6pm to 6am each night at the following locations:

- **Inside the rail alignment at Yagoona** between Farnell and Richie Roads, Yagoona
- **At Yagoona Station.**

Please refer to the map on the next page.

What will this mean for you?

Traffic movements may be delayed for short periods of time, typically less than 5 minutes, for plant deliveries through rail corridor access gates. For your safety, please follow the direction of traffic control personnel.

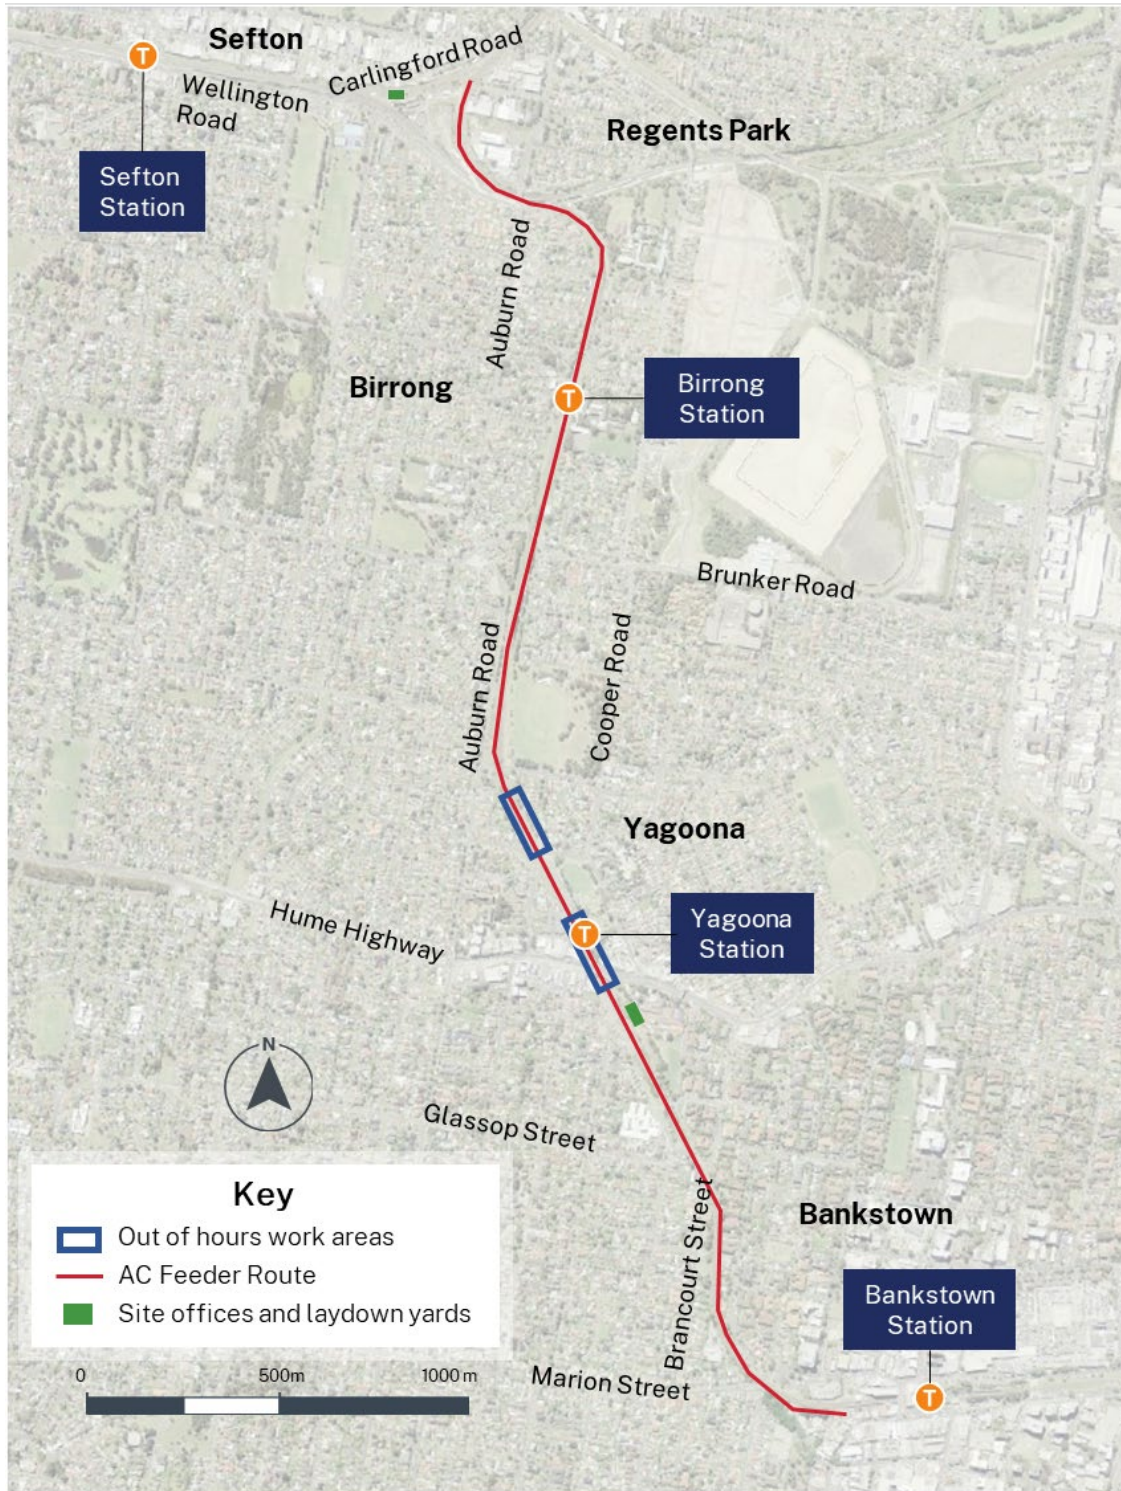

Transport for NSW is committed to minimising the impact on the community. You may notice an increase in construction vehicle movements within and near the rail corridor work areas. For residents living near the rail corridor, there may be some daytime noise from project work. We apologise in advance for any inconvenience this work may cause.

Managing our impacts

We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively. Higher noise-generating work is only expected to occur for short periods.
