

# AC Feeder Upgrade Project – Sefton, Birrong, and Yagoona

## Power Supply Upgrade

April 2023

Transport for NSW acknowledges the Darug and Eora Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and the new fleet of airconditioned trains. The work involves upgrades to substations, section huts, overhead wiring, and feeders as well as the construction of new infrastructure across the network.

In our recent community notification about the AC Feeder power supply upgrade work at Sefton, Birrong and Yagoona we informed you of works taking place in April 2023.

### Weekend work

We will soon be carrying out weekend work near you between the hours of **6am and 6pm Saturdays and 6am Sundays to 2am Mondays.**

On the weekend of **Saturday 15 to Sunday 16 April 2023**, the work locations will be inside the rail corridor at Teresa Street, Birrong and between Brunner and Farnell Roads, Yagoona.

On the weekend of Saturday 22 to Sunday 23 April 2023, the work locations will be inside the rail corridor at Teresa Street, Birrong.

Maps are shown on the next page.

### What work are we doing?

**Before the weekend we will be:**

- Delivering machinery and materials, and establishing our temporary work sites
- Trimming and removing vegetation
- Using an auger to pre-drill holes for new power poles and new earthing rods. Holes will be covered with temporary safety fences until the new power poles are installed.

This work will be during construction hours only.

### Weekend work will include:

- Replacing power poles
- Restringing conductors (wires)
- Restoring locations
- Testing and commissioning services.

### What will this mean for you?

Access to properties will be maintained. For your safety, please follow the direction of traffic controllers in attendance.

You may notice construction vehicle movements within and near the rail corridor work areas. There may be some daytime noise. We apologise for any inconvenience this work may cause.

### Equipment to be used

Machinery and equipment expected to be used include cranes, elevated work platforms, service vehicles, delivery vehicles, hand tools.

## Managing our impacts

We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively. Higher noise-generating work is only expected to occur for short periods.
