

# AC Feeder Upgrade Project – Bankstown, Condell Park and Revesby

December 2023

Transport for NSW acknowledges the Darug and Eora Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and the new fleet of airconditioned trains. The work involves construction of new electrical infrastructure across the network as well as the upgrades to substations, section huts, overhead wiring, and feeders.

The final phase of the project is to transfer the low voltage (LV) electrical wiring onto the new poles and to remove the redundant poles.

## What work are we doing?

Through December 2023 until the Christmas break, work will include:

- delivering plant and materials to and from temporary work sites
- trimming and removing vegetation from near power lines under the guidance of the project's Arborist, according to relevant approval from Council
- restoring locations when our work is finished.

## When and where we'll be working

Working hours are **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday**. Work may occur anywhere on the feeder route south of Griffith Park, Bankstown as shown on the map on the next page.

## What will this mean for you?

Partial lane and road closures may be in place close to the work areas where vegetation is to be trimmed. Access to properties and traffic movements may be delayed for short periods of time, typically less than five minutes. For your safety, please follow the direction of traffic control personnel.

Work may be loud, and we apologise for any inconvenience caused.

## Equipment to be used

Plant and equipment to be used include chain saws, cranes, elevated work platforms, delivery vehicles, chippers, electrical and hand tools.

## Managing our impacts

Transport for NSW is committed to minimising the impact on the community.

We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively. Higher noise-generating work is only expected to occur for short periods.

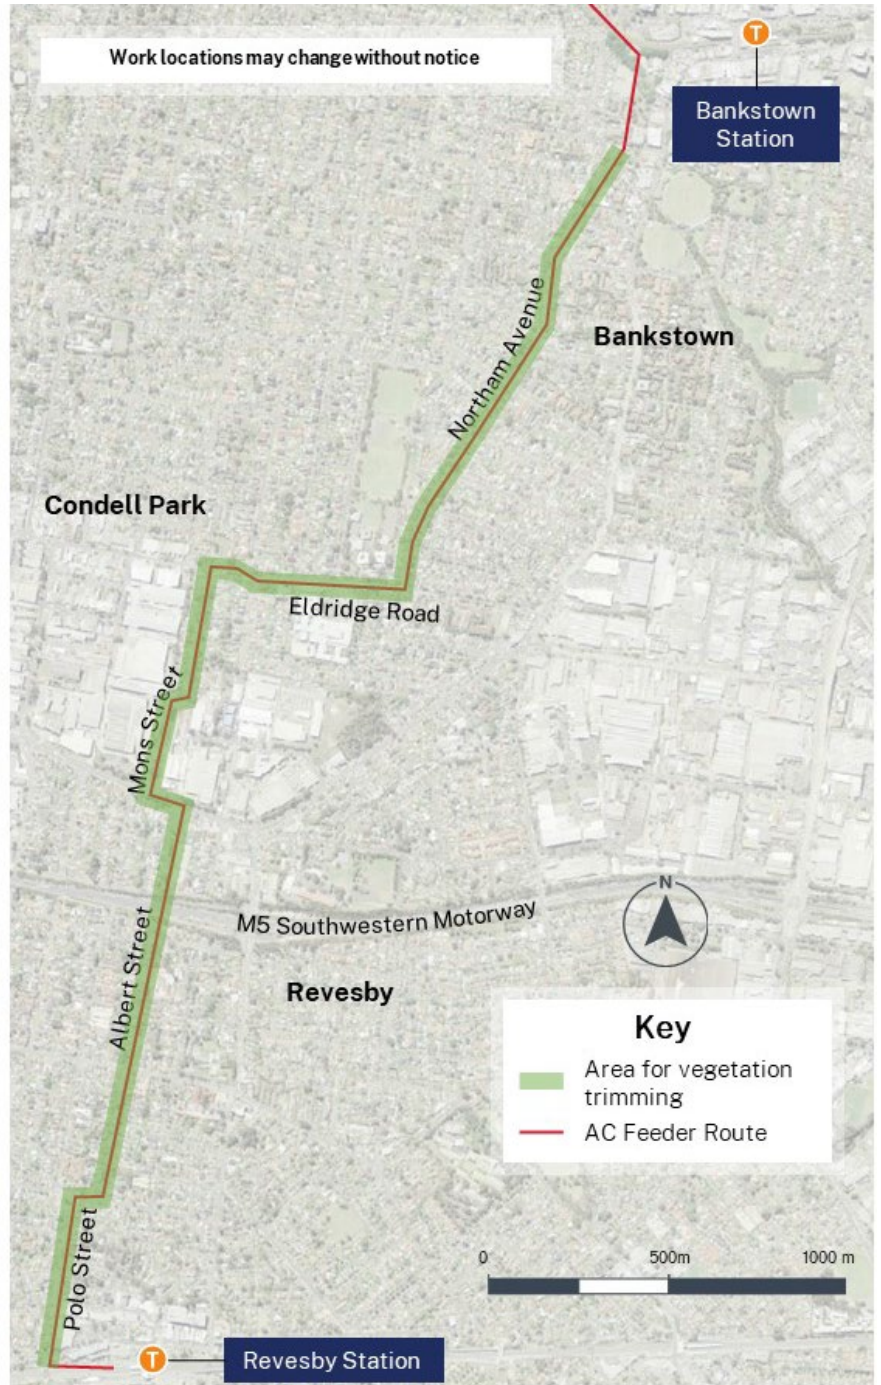

We apologise for any inconvenience caused and thank the community for their patience while we undertake this essential work.

## Christmas Holiday Period

The AC Feeders project team will finish work on Friday 22 December 2023 and will recommence work on Monday 8 January 2024.
