Bridge Road Pop-up Cycleway

Community Update | March 2022

Bridge Road is a key strategic bike riding route linking the Inner West to the City. In September 2020, we built the pop-up cycleway as part of the NSW Government's emergency response to COVID-19.

In March 2021, we consulted the community on whether the pop-up cycleway would stay. We received over 1,000 survey responses to our Have Your Say about the cycleway. We thank everyone who gave their feedback. After careful consideration, including investigating St Johns Road as an alternative route, we can announce the cycleway route will be kept on Bridge Road permanently, with upgrades to be made.

Community feedback and consultation report

Key findings from the consultation include:

- **67%** of respondents thought the temporary barrier should be upgraded to a different material.
- Feedback about suggested improvements to Bridge Road, road safety, or the pop-up cycleway, focused on cycleway design (**48%**) and safety (**40%**).
- The most popular feedback about the greatest benefits of the cycleway remaining focused on safety (**55%**) and increasing bike riding (**31%**).
- In response to the question asking for any feedback about the cycleway, the most popular comments focused on keeping the cycleway or supporting it (**40%**), followed by safety (**35%**). **50%** of responses to this question were generally positive about the cycleway, about **34%** were generally negative and about **15%** were neutral or mixed.

For more information, including about the consultation process, feedback received and our responses to it, please see the Bridge Road Pop-up Cycleway Community Consultation Report at nswroads.work/covid-infrastructure

The decision

Bridge Road is a key strategic bike riding route linking the Inner West to the City.

Based on the feedback received and the benefits of the cycleway – including improved safety, its growing use and delivery of a more sustainable travel option – the decision has been taken to keep it on Bridge Road permanently.

However, as a direct response to feedback, we will upgrade the current low-cost and temporary cycleway barrier, with its light-weight orange plastic paddles, to a more appropriate material. This will help achieve a better balance between moving people in a safe environment, while creating a cycleway better suited to the local area. Transport will also investigate the installation of a new parking bay for deliveries.

We will continue to update the local community about progress and next steps.
