

DC Feeder Upgrade Project – Newtown

Power Supply Upgrade

October 2023

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW is making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder Upgrade Project.

What work are we doing?

The DC Feeder Upgrade Project will improve power delivery to the railway across a number of sites on the rail network, including Newtown.

In October 2023 we will:

- establish a temporary site compound
- modify electrical infrastructure such as overhead wiring structures and metal fixings
- install, test and commission new electrical cables.

You may also notice deliveries of material and equipment to our work area and site compound via the site access point on Station Street. Please refer to the map overleaf.

When and where we'll be working

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays.**

Work will take place inside the rail corridor as shown overleaf. The site compound located on Gladstone Street between Phillip Street and Station Street will be used for storage of equipment and materials, worker parking and pre-start work meetings.

Out of hours work

Some work will take place outside of standard construction hours from **10pm Friday 13 October to 2am Monday 16 October 2023.**

Out-of-hours work will take place during a scheduled Sydney Trains trackwork period when no trains will be running. Scheduling construction work outside of standard construction hours enables us to complete the work safely.

What will this mean for you?

You may notice:

- workers and heavy vehicles
- noise from machinery and equipment.

Managing our impacts

We'll seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

There's a lot happening

Currently there are multiple project teams, transport agencies and contractors working within the rail corridor. For more information on work being completed by Sydney Trains, please phone 1300 656 999 or visit www.transport.nsw.gov.au/sydtraincommunity
