

AC Feeder Upgrade Project – Revesby Car Park

Power Supply Upgrade

September 2023

Transport for NSW acknowledges the Darug and Eora Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and the new fleet of airconditioned trains. The work involves upgrades to substations, section huts, overhead wiring, and feeders as well as the construction of new infrastructure across the network.

What work are we doing?

Work in September and early October 2023 includes:

- removing existing conductors (cables), excavating trenches, laying new electrical conduits, backfilling and compacting trenches and relaying asphalt
- installing new electrical conductors
- testing and commissioning services
- removing site sheds, plant and excess materials from temporary work site
- restoring the car park to operational status including removing temporary line markings and painting permanent line markings.

All work is dependent on weather and site conditions.

Equipment to be used

Plant and equipment to be used include excavators including hammer attachments, tip trucks and trailers, vacuum truck, winch truck, service vehicles, delivery vehicles, and electrical and hand tools.

When and where we'll be working

Work started in the Revesby Station car park on Monday 14 August 2023. Standard working hours are **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday**.

In addition to the standard working hours, the following out-of-hours work is planned:

- From **6pm to 6am the following day on Thursday night, 21 September 2023**, a team will be on-site for testing and commissioning of services. During this time work will be quiet and we expect minimal disruption to the community.
- From **7am to 6pm, Saturday 23 September, and 8am to 6pm, Sunday 24 September 2023**, teams will be on-site removing cables and excavating trenches.
- From **7am to 6pm, Saturday 30 September, and 8am to 6pm, Sunday 1 and Monday 2 October 2023**, teams will be on-site installing cables and undertaking associated work.

What will this mean for you?

In addition to the current temporary parking restrictions in the Revesby Station car park as previously notified, more temporary parking closures are necessary as per below:

- From **6am Saturday 30 September until 6pm Wednesday 4 October 2023**, up to 15 additional car spaces will be temporarily removed in the Polo Street car park (see map next page).

- From **6pm Saturday 30 September until 6pm Monday 2 October 2023**, the entire Polo Street car park will be closed for two days to safely facilitate work (see map below).

Access to the Revesby Abbey underground car park will remain in place temporarily via the temporary two-way lane along McCormack Lane. On-site signage provides further details.

For your safety, please follow the direction of signage and traffic control personnel.

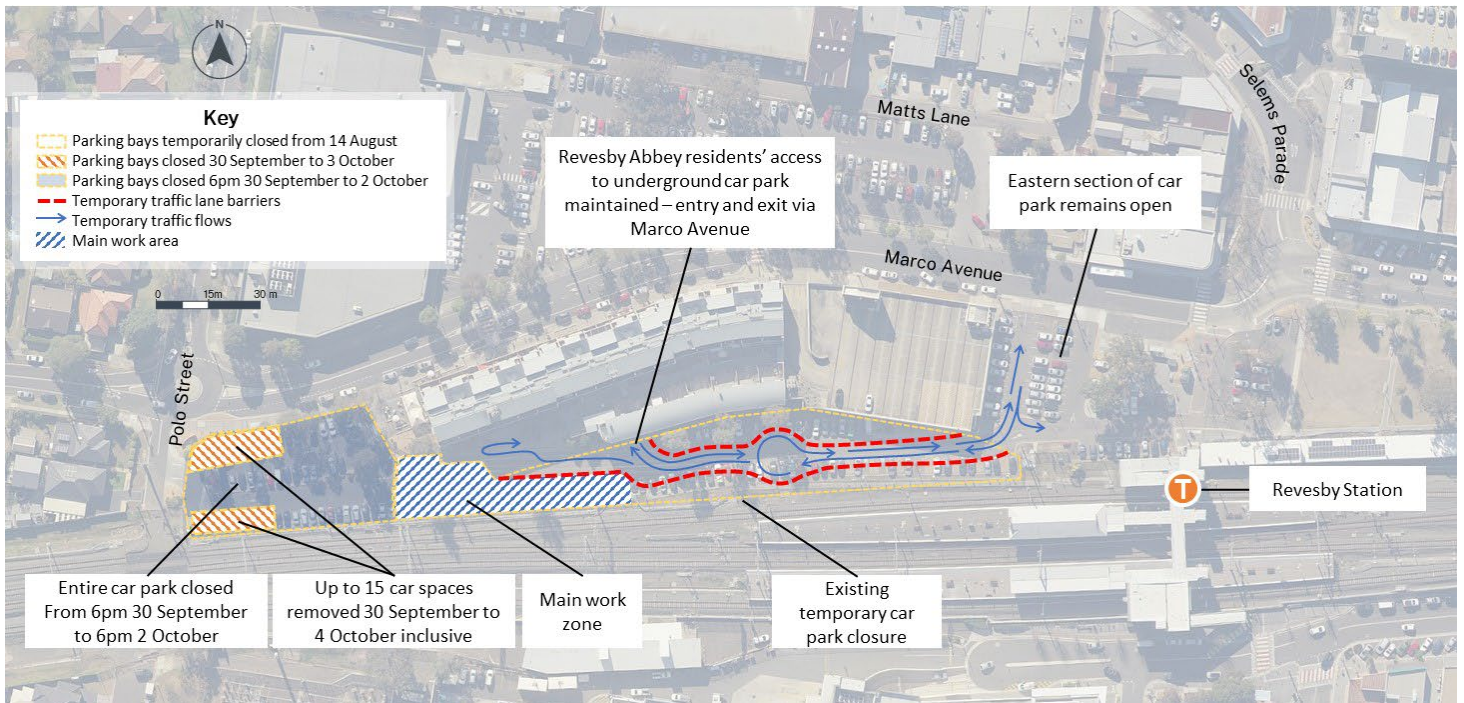

12 accessible car spaces that are within the work area have been relocated near the station entrance. These will be relocated to their original positions when the car park is reopened.

Managing our impacts

Some work may be noisy. We apologise in advance for any inconvenience this work may cause. Transport for NSW is committed to minimising the impact on the community.

We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively. Higher noise-generating work is only expected to occur for short periods.
