

AC Feeder Upgrade Project – Bankstown, Condell Park and Revesby

March 2024

Transport for NSW acknowledges the Darug and Eora Nations as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The AC Feeder Upgrade Project is part of the Power Supply Upgrade which is designed to meet expected power requirements for Sydney's future rail network and the new fleet of airconditioned trains. The final phase of the project is to relocate/transfer the Ausgrid low voltage (LV) electrical assets onto the new poles and to remove redundant poles.

What work are we doing?

Through March 2024 work will include:

- delivering plant and materials to and from temporary work sites
- trimming trees and vegetation
- relocating the existing Ausgrid Low Voltage electrical conductors (wires) and equipment from old poles to the newly installed poles
- installing new street lights
- reconnecting services at private properties
- installing standalone Ausgrid poles
- removing redundant poles
- restoring locations when our work is finished.

When and where we'll be working

Normal working hours are **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday**. Work may occur anywhere on the feeder route between Bankstown and Revesby. Out of hours work will need to be conducted depending on the availability of Ausgrid power isolations.

Out of hours work is scheduled from **6pm to 6am the following morning** at the following locations:

- **Brandon Avenue, Bankstown** between Northam Avenue and Dale Parade, **Northam Avenue** cul-de-sac, and in **Griffith Park** on **Monday 4 March**

A map of work areas is shown on the next page. Further out of hours work may be scheduled through March based on planning and approval by Ausgrid. If so, further notifications will be provided to affected businesses and residents. Cancellation of work due to weather may occur without notice.

What will this mean for you?

If the electricity supply to your property is anticipated to be affected, Ausgrid will provide a separate notification to you via letterbox or via SMS. Power will be restored as soon as it is safe and practical to do so.

Access to properties near pole locations may be affected for short periods, typically 2-3 minutes at a time. Temporary lane closures may be in place and traffic controllers will be managing the traffic flows.

You may notice construction vehicle movements near work areas and there may be some noise. Temporary construction lighting will be in use for the safety of workers.

Equipment to be used

Plant and equipment to be used include chain saws, chipper, auger, vacuum truck, cranes, elevated work platforms, delivery vehicles, electrical and hand tools.

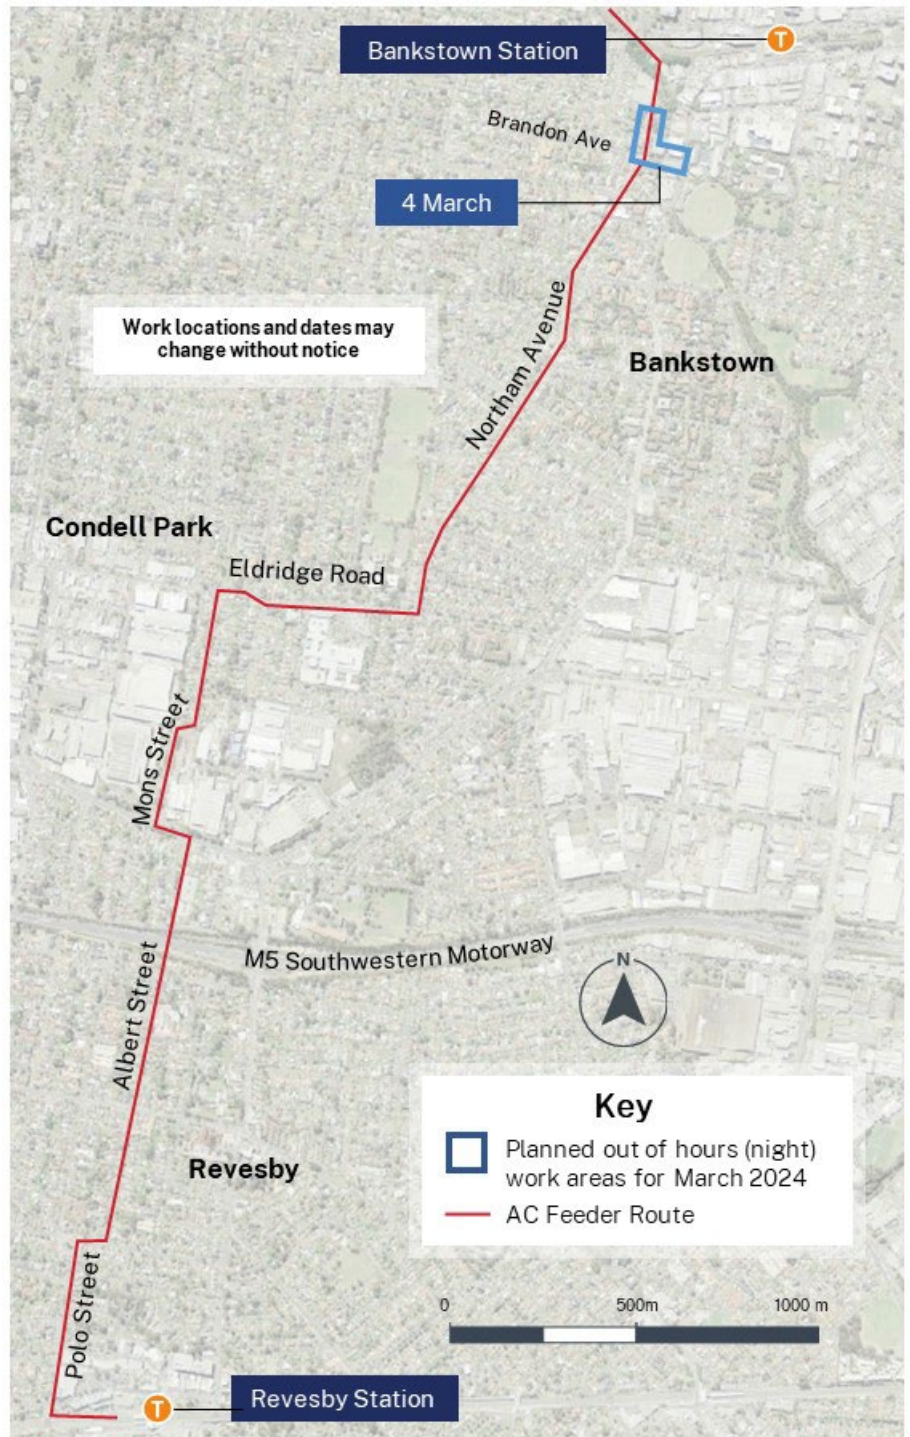

Managing our impacts

Transport for NSW is committed to minimising the impact on the community.

We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively. Higher noise-generating work is only expected to occur for short periods.

We apologise for any inconvenience caused and thank the community for their patience while we undertake this essential work.
